

ŠKODA AUTO HELPS

ŠKODA AUTO HAS SUPPORTED **NUMEROUS ORGANISATIONS** DURING THE CORONAVIRUS PANDEMIC

ŠKODA AUTO started supporting healthcare workers, social service providers and volunteers as soon as the outbreak of the **COVID-19 pandemic** was announced. We got together with ŠKODA AUTO **DigiLab**, our innovation centre that operates the **HoppyGo** and **Uniqway** car-sharing platforms, to lend cars and electric scooters provided through the **BeRider** sharing platform to a total of **89 organisations**. This way, we helped over **50,000 people in need** in March and April alone.

ŠKODA

 **>200**
 **vehicles lent**

 ŠKODA AUTO its car-sharing platform, HoppyGo, have provided over 200 vehicles for charity organisations.

 **89**
organisations

We have helped 89 organisations, including volunteer associations, charities, care centres, social service centres and healthcare centres across the country.

100
ŠKODA OCTAVIAS

ŠKODA will donate 100 new vehicles to providers of domestic healthcare and social services.

16
ŠKODA AUTO authorised partners

Regional ŠKODA AUTO authorised partners from all over the Czech Republic have offered their assistance. Sixteen of them have already joined our initiative by lending their vehicles.

#SKODAAUTOhelps

 **20,000**
PRUSA face shields distributed

ŠKODA Logistics has distributed nearly 20,000 protective face shields produced on PRUSA RESEARCH 3D printers to doctors all over the country.

1,600
trips made by healthcare workers on electric scooters: over 16,000 kilometres in total

We have provided a fleet of 150 BeRider electric scooters for use free of charge by healthcare professionals, such as doctors, nurses and paramedics.

>50,900

people in need supported

Using vehicles provided under the #SKODAAUTOpomaha initiative, collaborating organisations have already helped over 50,900 people. The vehicles are used to distribute healthcare consumables, food and drugs, as well as to transport healthcare staff to patients.

>500
vehicles disinfected

We have built a sanitising station in Prague: five ozone generators are used to disinfect up to 150 vehicles exposed to risk of infection every week.

240,000
respirators and face masks delivered

ŠKODA AUTO vehicles have distributed nearly a quarter of a million respirators and face masks to those who need them most.
