InnoGames Unleashes PvP on iOS: Tribal Wars 2 Launches New App

Online Games publisher releases a cross-platform version for iPhones and iPads

Hamburg, June 24, 2015. Online games developer [InnoGames](#) just launched the [iOS version](#) of its cross-platform strategy game [Tribal Wars 2](#). Players can download the app for free on the Apple App Store and it supports all iOS devices from the iPhone 4S on. Tribal Wars 2 is fully cross-platform, which allows users to seamlessly switch between Android, browser and now the iOS-App and never lose progress. The game follows its legendary browser predecessor [Tribal Wars](#), which has 55 million registered players worldwide.

Tribal Wars 2's cross-platform-approach lends itself perfectly to the game's hardcore-PvP as it's playable on a single account across numerous devices and operating systems. Players cooperate in large tribes, having to coordinate strategies and attacks in real-time. Constant access to the action in-game via phones and tablets gives engaged players an edge over their competition.

In Tribal Wars 2, players find themselves as the leader of a small village in the midst of a medieval world. Tasked with growing and expanding their empire within a war-torn landscape, they have to fight in order to survive. The MMO's focus is real-time, strategic battles with and against other players.

With about 130 million registered players, InnoGames is one of the world's leading developers and providers of online games. Currently, the Hamburg-based company employs 350 professionals from 25 nations. InnoGames has scored major success with games such as [Tribal Wars](#), [Grepolis](#) and [Forge of Empires](#).
