Launching August 2025

BERGVATTNET

Get ready for almost the same bathroom experience as always

We're all completely dependent on fresh water, an increasingly scarce resource. That's why IKEA aims to reduce use, looking at everything from sourcing and production of our range to how the products are used at home.

Enter **BERGVATTNET** collection – a functional, fun and water-efficient piece of the puzzle.

BERGVATTNET and the bigger picture

The availability and quality of water is an increasingly serious global challenge. Today, four out of ten IKEA store visitors live in water-scarce regions.

Through our water agenda, we are committed to working towards reducing fresh water use, like in the case of BERGVATTNET collection. We will also strengthen our efforts to improve water quality and prioritise actions that ensure access to clean water for communities around the world.

Do you want to know more about our current water initiatives? [Read more*](#)

Same shower. Different story.

BERGVATTNET collection is developed to reduce water-flow rates, monitor consumption and collect water that would otherwise go to waste. The simple and affordable products have the power to turn a more water-efficient everyday life into routine. Meanwhile, you can keep doing you.

New**BERGVATTNET**Auto diverter
for shower**29,99**

For less water down the drain

You know the first chilling moments in the shower before the water heats up? Now, it's easy to save those precious cold drops for later. BERGVATTNET auto diverter automatically directs water below 32°C into the BERGVATTNET bucket and switches to the hand shower once the water gets warm. Use the water you save for your thirsty plants, to flush the toilet or to clean the floors.

New

BERGVATTNET
Water meter for shower

39,99

And the quickest shower award goes to...

Keep track of how long you shower, at what temperature and how much water you use with BERGVATTNET digital water meter. It connects to all bottom outlet shower mixers and has the potential to make being water-efficient much more fun. Who in your family wins the Quickest – or Coolest – Shower Award?

A close-up, angled view of a blue hand shower. The shower head is white and oval-shaped, featuring a grid of small, grey, cylindrical nozzles. The blue handle is thick and ergonomic, extending from the bottom left towards the top right. The background is a soft, out-of-focus light brown.

New

BERGVATTNET

Single spray hand shower
with hose

12,99

Get into the low flow

Thanks to the much smaller nozzles, the flow rate of BERGVATTNET hand shower with hose is significantly lower than most other showers – and still ensures you get a proper rinse. Since it connects to all outlets, it converts nearly every shower into a water-saving version.

New

BERGVATTNET
Booster for
hand shower
7,99

Give it up for adjustable shower power

BERGVATTNET booster turns your ordinary shower head into a water-efficient version by reducing the flow to 6 litres/minute. Best of all – when you need a bit of extra shower power, you get it at the push of a button.

n

For a bathroom that pops

Being more water-efficient doesn't have to be complicated or dull. BERGVATTNET collection, from towels to shower head, comes in bright blue and in playful patterns that add a bit of fun to bathroom life.
