Disclaimer

The data in this publication was compiled by the Vehicle Certification Agency, an Executive Agency of the Department for Transport. Whilst every effort is made to ensure that the information contained on this site is accurate, the Vehicle Certification Agency cannot accept liability for its accuracy. Visitors who rely entirely on the information do so at their own risk.

It should be noted that as the fuel consumption figures quoted are obtained under specific test conditions, they may not be achieved under 'real world' driving conditions. However, the figures serve as a means of comparing models of a similar type.

On the 1 September 2017 the new Worldwide Harmonised Light Vehicle Test Procedure (WLTP) came into force. ► [Read more about WLTP here](#)

Because of the nature of testing procedures, the type approval emissions figures (shown by clicking on 'vehicle details' from the search results) should be treated with caution and specifically should not be used to rank a number of vehicles for which similar figures are quoted.

Similarly, when looking to find out the Euro Standard for a vehicle already in service, we strongly recommend that you contact the manufacturer

Read more about using the database, calculating Car Tax and finding a Euro Standard on ► [VCA's Terms and Conditions page](#).
