

ThinPrint Brings Mobile Printing to VMware Workspace ONE

Workspace ONE customers can now easily and securely manage printing from iOS and Android devices using ThinPrint Mobile Print

BERLIN/LAS VEGAS - August 27, 2018 (VMworld 2018 Booth #2007) - [ThinPrint](#), the Endpoint Print Management experts and a VMware Technology Alliance advanced partner, today announced the availability of its secure mobile printing solution, ThinPrint Mobile Print, for VMware Workspace ONE. Customers of Workspace ONE can leverage the solution's management capabilities to easily open their organization's printer infrastructure to its mobile users. It provides employees with the ability to seamlessly and securely access all network printers from their iOS and Android devices, fully in accordance with their assigned permissions.

ThinPrint's Mobile Print solution is configured and distributed with VMware Workspace ONE, an intelligent digital workstation platform that delivers apps to a variety of devices, including iPhones, iPads and Android devices. Mobile users can access all network printers in their organization, no matter which printer model or manufacturer is in use. For IT departments, management is very simple. IT admins can easily adopt printer assignments and user rights from the Microsoft Active Directory, and if required, adapt them specifically for mobile use.

ThinPrint's Personal Printing feature is also integrated in the solution for added document security. It is used to ensure printouts are only outputted when the user authenticates directly at the printer. This feature not only ensures confidential printing of documents, but also significantly reduces printing costs.

"Strengthening our cooperation with VMware through ThinPrint Mobile Print is a decisive step in consolidating our leadership of the Endpoint Print Management market." said Thorsten Hesse, CPO at ThinPrint. "Every VMware Workspace ONE customer can now integrate secure mobile printing processes into their infrastructure based on their Unified Endpoint Management solution – the final component for genuine mobile productivity in many organizations and scenarios."

The ThinPrint VMware Workspace ONE solution is being showcased at VMworld 2018, Booth #2007. Full details about ThinPrint Mobile Print are available at:
