- Pitch control
- RIAA equalizer
- Wood cabinet
- included: CE-UK multiplug AC Adaptor, Premium quality RCA cable
- Connections: RCA output, ground

This quartz drive turntable uses a crystal oscillator to keep the platter spinning at a steady, precise speed, constantly adjusting the motor for accurate, reliable playback.

Precision, performance, and premium design come together in the LBT-515WD — a direct drive turntable built for serious vinyl enthusiasts. Housed in a beautifully finished wood cabinet, it features the Ortofon 2M Blue cartridge, known for its outstanding clarity and dynamic range, delivering a truly refined listening experience.

Direct-Drive Turntable

The direct drive motor offers consistent rotation with two speed settings (33 and 45 RPM), supported by a 300mm metal platter, mechanical arm lift, anti-skating, and adjustable pitch control — giving you full control over every record. The preamp can be switched on or off, making it easy to integrate into any audio setup.

Gold-plated connectors, RCA and ground outputs, and a built-in RIAA equalizer ensure clean, high-fidelity signal delivery across the board.

Additional features include a start/stop control, metal tonearm and counterweight, and a removable dust cover to protect your deck when not in use.

Bluetooth Transmission

Enjoy Bluetooth 5.3 transmission with volume control, allowing you to stream your vinyl wirelessly to Bluetooth speakers or headphones.
