

## **Thales joins the climate index on the Paris Stock Exchange**

**On September 14, 2023, Thales was selected to join the CAC SBT 1.5° index, the 'climate' version of the SBF 120 French stock market index.**

The CAC SBT 1,5° was launched in January 2023 by Euronext with the support of [Amundi](#), the [Carbon Disclosure Project \(CDP\)](#) and the [Science Based Targets initiative \(SBTi\)](#). It meets investors growing demand for sustainable investment instruments.

The CAC SBT 1,5° regroups companies on the SBF 120 French stock market index whose greenhouse gas emissions reduction objectives have been recognized, by the SBTi, as being in line with the 1.5° target set by the Paris Agreement. It only includes companies that respect the United Nations Global Compact principles.

In March 2023, Thales's climate objectives were approved by the SBTi. The Group has committed to reduce by 2030, in absolute terms, its operational greenhouse gas emissions (scope 1 and 2\*) by 50.4%, and its emissions related to its supply chain and to the use of the company's products by its clients (scope 3\*) by 15%.

Thales's strategy for a low-carbon future was strengthened in 2021 around three main axis:

- Accelerate the reduction of operations-related CO<sub>2</sub> emissions (Scopes 1 and 2) by aiming for net zero by 2040;

- Increase the engagement of the entire supply chain;
- Deploy eco-design for product innovation.

*‘This recognition by the financial community of our efforts to decarbonize our operations, as well as those of our suppliers and customers, testifies to the seriousness of our strategy for a low-carbon future. Furthermore, as a major global technology player, we know that we have a role to play in tackling the multiple challenges posed by climate change to individuals, states and economies.’*

- Patrice Caine, CEO

\* Compared with the 2018 baseline year
