

## CONFIDENT VISIBILITY

New Range Rover Velar pushes the boundaries of Pixel LED lighting technology, to enhance your confidence when driving.

### INTELLIGENT BEAM

Adaptive Driving Beam is able to cast shadows around four oncoming objects avoiding dazzle.

4

### ADAPTIVE

Adaptive Driving Beam automatically adapts to vehicle speed, casting a wide beam at low speeds and a more intense, longer beam above 70km/h.

### PRECISE CONTROL

Each headlight features four pixel modules with 67 precisely controlled LEDs in each one, to accurately adapt to the conditions and the road ahead and provide the most effective forward beam.

67

### EXTENDED VISIBILITY

Dynamic Bend Lighting uses speed and steering data to respond to the road and illuminate dark corners and verges, while the high beam range can focus light almost half a kilometre in front, for optimum visibility.
