

Acer Presents its New Consumer Desktop Lineup with 4th gen Intel Core

Editor's Summary:

- New line up of desktops designed to offer best-in-class home computing experience
- All-in-one, tower and gaming models to satisfy different users with different habits
- A range of desktop offering outstanding entertainment

Brussels, 14 June 2013 – Acer today unveiled the new consumer desktop lineup, completely refreshed to offer users an improved and more ergonomic home computing experience. The range of new models includes the Aspire Z3-605 all-in-one and the micro-tower Aspire TC-603, both designed to appeal to home users looking for best home entertainment and everyday computing.

Acer also introduced a high performance gaming desktop PC, the Predator G3-605, designed for enthusiast-level gaming and exceptional graphics. The G3-605 is equipped with fourth generation Intel® Core™ processors up to Core i7 to provide smarter performance, better visual experience and more reliable security, while the Aspire Z3-605 and TC-603 feature up to Core i5 processors

Aspire TC-603 - Expandable HD multimedia centre

The Aspire TC-603 comes in a typical micro-tower format and a stylish modern design enhanced by the brushed metallic finish on the front. Different materials and textures – glossy black, silver chrome, brushed silver – are combined to create visual richness. The most used ports are easy to access as they are nicely grouped on the front; on the top there is a handy recess where users can put their tech gadgets.

The TC-603 models offer competent multi-tasking performance to easily handle common daily tasks and to speed up everyday computing. Powerful graphic solutions mean this desktop delivers incredible HD entertainment with excellent visual quality, plus it provides immersive 3D entertainment with incredible audio-visual quality thanks to the HDMI 1.4 port. Needless to say the Aspire TC-603 comes with plenty of room for ever growing multimedia libraries. The multi-in-one card reader allows effortless file transfer

and sharing, while the USB 3.0 ports allow much faster file transfer using less power and make it easier to link up any device you need.

Aspire Z3-605 - Your Best Family AIO PC

The 23-inch Aspire Z3-605 all-in-one desktop is designed to offer best performance and an all-round entertainment experience to the entire family. While the 1080p 23" Full HD IPS panel presents amazing images and natural-looking colours, premium Harman Kardon® speakers and Dolby® Home Theater® v4 surround sound unlock a world of cinematic audio with crystal clear, accurate sound, just like the original. The Aspire Z3-605 is also available with the option of 10-point multi-touch screen enabling users to interact more intuitively with Windows 8 Metro UI and App,

To improve user experience, the Aspire Z3-605 can sit upright or at an angle up to 30°. The webcam is adjustable as well, so that even children can sit comfortably in front of it and chat at ease. The most frequently used ports, including a USB 3.0, are grouped together in the port capsule. This stylish area offers users a fast and easy way to access data, listen to music and even switch off the monitor when it's not used. To enhance the neat design of the PC, the stand of the Z3-605 has hooks that keep cables in position and the desk tidier.

Predator G3-605 – Unlimited gaming experience

Dedicated to passionate gamers, the Predator G series inherits the sci-fi style from the previous generation models, but takes it a step further with colour accentuating the profile of the desktop for a sleeker effect. The power button has an iconic triangle shape with a chrome trim and 3 indicators to let users know system and connection status.

The top handle can be used to move the Predator, plus it features an angled recessed area where digital gadget can be stored. The deck has a convenient groove design that allows fitting cables in between, thus avoiding tangles.

The innovative IceTunnel cooling system improves the air flow and brings out internal heat more efficiently. Gamers usually wear headsets for a fully immersive experience; this is why the Predator comes with a handy cradle where users can hang their headset.

Running on the latest Intel Core processor and powerful graphics solutions, the Predator empowers unlimited gaming performance, which is rounded out by SoundBlaster Cinema to deliver a new level of audio immersion. The totally realistic surround sound with the ability to hear even the faintest sound enhances the overall experience, whether it's music, games or movies.

The G3-605 houses an Acer Easy-swap expansion bay; this means users can move or switch their data quickly and easily. To protect users' information the bay comes with a lock, so the hard disk can be secured. With Acer Easy-swap expansion bay there'll be always room for users' ever growing multimedia files. When the disk is full all you have to do is replace it with a new one and you can also take it with you to share your entertainment with your friends.

Pricing and Availability

The new Acer desktops will be available in EMEA starting from: Predator G3-605 - August from €799 to €899*; Z3-605 – June, from 699€ to 999€*; TC-603 – July, from 599€ to 1 199€*.

*.*Prices vary based on model/country*
