Baby's & Kid's

Super Daily D3

Natural vitamin D3
promotes healthy
growth and
development

Just 1 Drop Delivers the Perfect Dose of Vitamin D3 for your Child

As recommended by the American Academy of Pediatrics

Baby's Super Daily D3

Breast milk and formula are excellent nutrient sources for babies but often don't provide enough vitamin D. And while many of us rely on the sun to help our bodies produce vitamin D, sun exposure isn't recommended for babies younger than 6 months. Vitamin D promotes healthy growth and development, helps our bodies absorb calcium and phosphorus; and supports teeth, bone, and muscle health. To make sure your baby gets an adequate amount of vitamin D, a daily supplement may be a great option. Baby's Super Daily D3 is easy to use with formula- or breast-fed infants.

400 IU	10.3 mL Liquid	1250

Kid's Super Daily D3

Because our children's bodies can't produce vitamin D on their own, they must get it through their diets or from exposure to direct sunlight. Children can get vitamin D through foods like oily fish, including salmon, mackerel, and tuna; fortified milk; or cereal, but getting enough from diet alone can be difficult. And because of the risk of skin cancer, it's not recommended that children spend too much time in the sun. For children who are not getting enough vitamin D, a supplement may be a great option. Vitamin D promotes healthy growth and development, helps their bodies absorb calcium and phosphorus; and supports teeth, bone, and muscle health. Kid's Super Daily D3 can be placed in food or a drink or directly on the tongue.

400 IU	10.3 mL Liquid	1260

Baby's and Kid's Super Daily D3:*

- Promote healthy growth and development
- Support teeth, bone, and muscle health
- Contain 400 IU of concentrated vitamin D in each liquid drop
- Each bottle contains 365 drops, one for every day of the year
- Unflavored with no aftertaste
- Freshness, potency, and purity guaranteed

Making sure your Kids get their Vitamin D is Easy

- » One highly-concentrated liquid drop provides children with 400 IU of natural-source vitamin D3, the recommended daily dose of the American Academy of Pediatrics.
- » Our advanced dropper technology allows a perfectly measured drop to be released from the bottle. Each bottle contains a one-year supply.
- » Super Daily D3 is tasteless and odorless and can be placed directly on the tongue or in food or a drink. It's also easy to use with breastfed infants.
- » Simply hold the bottle upside down until a perfectly measured drop is dispensed. There is no need to shake the bottle. (This dropper technology removes the risk of contamination from rubber droppers.)
