aluminium

The durable aluminium exterior provides perfect long lasting protection against all weather conditions!

The specially designed connection between the aluminum at the outside and the wooden frame at the inside eliminates the risk for deformation due to temperature and humidity.

The PURITY design handle gives a unique touch of style to your window and makes the use of it a real pleasure.

You can choose between three types of high quality natural wood to perfectly match your interior.

# SENSITY

## COMBINING THE BEST OF ALUMINIUM AND WOOD

SENSITY is a highly insulated aluminium system for windows, based on the technologically refined Reynaers CS 86-HI system, providing the best guarantee for a comfortable interior climate. The thermally insulated aluminium frame will ensure the durability, wind and water tightness and acoustic performance of your windows.

This window system is perfectly suitable for different architectural creations. The aluminium at the outside allows you to personalise your windows, by selecting from over 100 possible RAL colors, from 60 structural Coatex surfaces or even give it a "wooden-look" finish, while maintaining the ultimate low maintenance properties of the aluminium.

## SELECT YOUR NATURAL WOOD

You can choose between three types of high quality natural wood to perfectly match your interior.

## PURITY<sup>®</sup> DESIGN HANDLES

The specially designed PURITY handle makes your windows come to life. This high-quality handle combines next-generation materials and mechanical properties with the superior Italian design abilities of designer Leo De Carlo, who previously worked in the studios of Philippe Starck. De Carlo translated the Reynaers culture into the unique PURITY design.

The combination of the material and its surface treatment makes the handles non-corrosive, hypoallergenic and 100% recyclable. Furthermore, thanks to its extraordinary durability, PURITY will maintain its original state for years.
