### **Forge of Empires Comes to Facebook: InnoGames publishes hit strategy game as Canvas App on social network**

**Hamburg, Aug. 13, 2015.** Today the online games developer [InnoGames](http://InnoGames) gives city-building fans more choices with the release of the popular mobile and browser strategy game [Forge of Empires](#) on Facebook. Now, new and existing players can multitask by playing and interacting with their Facebook friends simultaneously without any game limitations.

Aspiring city rulers will be able to enjoy the same advantages of playing Forge of Empires on browser or mobile, like playing on the same servers and playing on multiple worlds. The App integration won't change anything for existing players who can still play the game within using a Facebook account. Players can also switch back and forth between the several platforms.

Forge of Empires is a strategy game, where players, tasked with leading their own city to prosperity, can research new technologies, build impressive historical buildings and enlarge their sphere of influence through military campaigns and skillful dealing. The game has been awarded the title of "Best Browser Game 2013" at the German Computer Game Award (Deutscher Computerspielpreis). On iPad it was top 5 new strategy games in the US in 2014.

With about 150 million registered players, InnoGames is one of the world's leading developers and providers of online games. Currently, the Hamburg-based company employs over 350 professionals from 30 nations. InnoGames has scored major success with games such as [Tribal Wars](#), [Grepolis](#) and Forge of Empires.
