H90 Control Bluetooth app for iPad for Eventide H90 Harmonizer® pedal unveiled

Anaheim, CA — January, 24, 2024 — Eventide Audio has announced the immediate availability of the H90 Control iPad app Release 1.7.6, which enables Bluetooth functionality. H90 Control provides remote control access and Program list management for the H90 Harmonizer® pedal. The app lets users manage Program and Preset settings, perform system updates, and import/export User Lists with an easy-to-use interface, all now with the convenience of Bluetooth connectivity.

The release also implements a new Bypass mode in System Settings – “AB Only” – which allows users to bypass just the onboard effects, leaving insert routings active. It also adds support for full user content backup/restore and log retrieval in H90 Control.

H90 Control for iPad is available for free download from the [Apple App Store](#).

For H90 users who have updated their H90 firmware to 1.7.4+, H90 Control Release 1.7.6 for MacOS and Windows adds Backup/Restore for user content (Programs, Lists, Presets) and system settings.

H90 Control for Mac and Windows is only available for H90 owners who have registered their H90 pedal.

About Eventide:

Eventide has remained at the forefront of recording technology since 1971. In 1975, they revolutionized the audio industry by creating the world's first commercially available digital audio effects unit, the H910 Harmonizer®. Since then, their legendary studio processors, effects pedals and plug-ins have been heard on countless hit records.
