

Things to Know About Pixel Buds 2a

Pixel Buds 2a

01

Meet Pixel Buds 2a.

Meet Pixel Buds 2a, the latest A-Series earbuds from Google, offering key earbud essentials at an unreal value. Inspired by the industry-leading design of Pixel Buds Pro 2, Pixel Buds 2a delivers lightweight comfort, crisp audio, Active Noise Cancellation with Silent Seal™ 1.5, and all-day battery with the charging case.¹ And you can adjust the fit for workouts or commutes with the twist-to-adjust stabilizer. All this and more, for less.²

Pixel Buds 2a are available for \$129.99 and come in Hazel and Iris.

02

Ultra light. Ultra comfortable.

We designed Pixel Buds 2a to be our lightest, smallest A-Series earbuds yet. And like the industry-leading design of Pixel Buds Pro 2, they're made for maximum comfort. Using data from over 45 million ear scans, we meticulously engineered them to deliver all-day comfort for all kinds of ears.

And with IP54 sweat and water resistance, Pixel Buds 2a are built to last through tough workouts or unexpected rain – so sweat and a little water won't dampen the moment.³

03

Twist for a more secure fit.

Get a comfortable fit with your Pixel Buds 2a, whether you're working out or commuting. With the twist-to-adjust stabilizer, you can just twist the earbuds counterclockwise for a snug fit, or clockwise for a more relaxed feel. Plus, with four different eartip sizes included, ranging from extra small to large, you're sure to find the right fit for you.

Pixel Buds 2a

04

The first A-Series earbuds with Active Noise Cancellation.

For the first time on A-Series buds, you can use Active Noise Cancellation with Silent Seal 1.5 to help block external noise for clear and uninterrupted sound, or switch to Transparency mode when you want to hear the world around you while you listen.

Immerse yourself in clear, crisp audio with the redesigned acoustics and 11 mm dynamic speaker driver. Or surround yourself with sound using stereo spatial audio.⁴ Plus, customize your sound with the 5-band equalizer, adjusting bass, treble, and more to your liking.

05

Crystal clear calls.

Hear and be heard clearly on every call with Pixel Buds 2a. Wind-blocking mesh covers and Google AI work together to reduce background noise, so wind, chatter, and other distractions won't interrupt your conversations. You can be confident your voice will come through loud and clear.⁵

06

Talk with Gemini, hands-free.

With Pixel Buds 2a, you can get help from Gemini without taking out your phone. Whether you're retrieving information from recent emails, getting walking directions or brainstorming aloud when you go Live with Gemini, all you have to do is start talking.⁶

07

Tap to take control.

Control your Pixel Buds 2a without reaching for your phone. With a simple tap, you can start a conversation with Gemini, play, pause, skip tracks, and seamlessly switch between Active Noise Cancellation and Transparency mode.⁶

Pixel Buds 2a

08

Powered by Tensor A1.

The Tensor A1 chip in Pixel Buds 2a delivers premium audio, making music crisper, richer, and more detailed, and calls clearer than ever.⁷ It processes audio 90 times faster than the speed of sound to adapt to you and your environment, helping cancel out unwanted noise. Plus, it unlocks the power of Google's advanced AI and Gemini features.⁶

The Tensor A1 chip also helps you listen longer, providing 7 hours of listening time with Active Noise Cancellation on, and 20 hours of listening time with the charging case.⁸

09

A Pixel-perfect pairing.

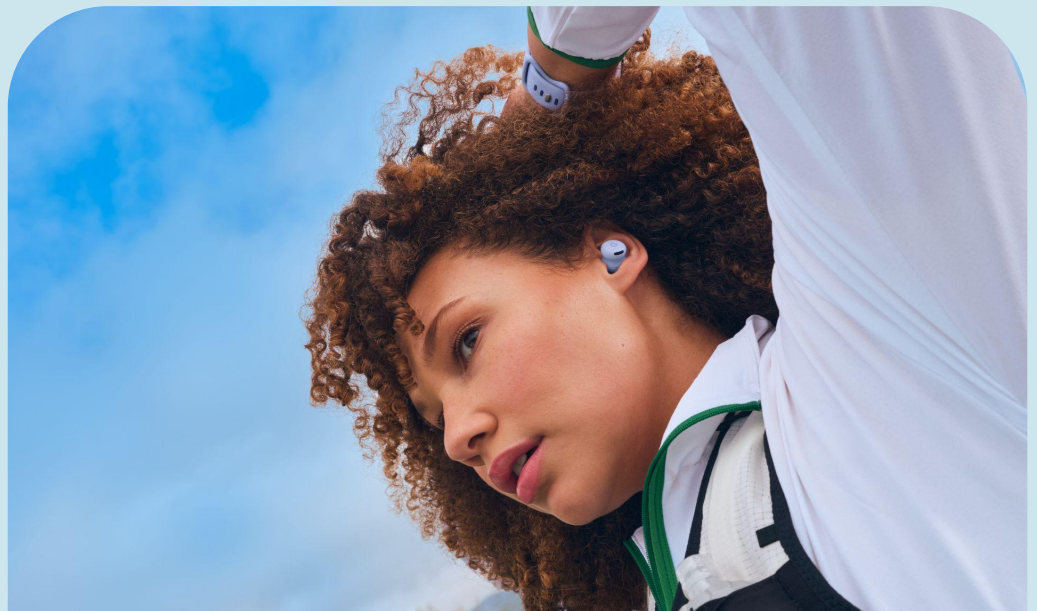

Pixel Buds 2a are designed to work seamlessly with all your Pixel devices, so you can enjoy features like Clear Calling, Find Hub, and easy device switching with multipoint.^{5,9,10}

Find Hub can pinpoint the precise location of your earbuds on a map.⁹ And when you're nearby, you can ring them to find them even faster – even if the earbuds are in the case.¹¹

10

Sustainability never sounded better.

Pixel Buds 2a are made with recycled materials and the packaging is 100% plastic free.^{12,13} And for the first time, the batteries in the charging case are now replaceable.

Pixel Buds 2a

- 1 Up to 27 hours of total listening time with charging case. All listening times are approximate and were measured using music playback with pre-production hardware and software, with fully charged Pixel Buds 2a and case, and Active Noise Cancellation and other features disabled. Case is used to recharge Pixel Buds 2a. Charging times are approximate. Use of other features will decrease battery life. Battery life depends on device, features enabled, usage, environment, and many other factors. Actual battery life may be lower.
- 2 Compared to price of Pixel Buds Pro 2.
- 3 Pixel Buds 2a are designed to comply with water protection rating IP54 under IEC standard 60529 when the device leaves the factory, and the case is rated IPX4, but they are not waterproof. Water resistance is not a permanent condition and decreases or is lost over time due to normal wear and tear, device repair, disassembly, or damage. Dry your Pixel Buds 2a and case after exposure to any liquids. Liquid damage voids the warranty.
- 4 Available only on Pixel Tablet and Pixel 6 and newer Pixel phones (sold separately). Requires compatible app and supported content. See g.co/pixelbuds/help for details.
- 5 Call quality depends on signal strength, environment, network traffic, and many other factors. Actual results may vary.
- 6 Requires pairing with compatible Android device (sold separately) with Gemini mobile app and a Google Account. Internet connection required. Features may differ depending on subscription and account. Some apps require setup. Available in select countries and languages. Check responses for accuracy. Data rates may apply.
- 7 Compared to Pixel Buds A-Series. Call quality depends on signal strength, environment, network traffic, and many other factors. Actual results may vary.
- 8 All listening times are approximate and were measured using music playback (continuous music at 50% volume) with pre-production hardware and software, with fully charged Pixel Buds 2a and case, and Active Noise Cancellation turned on but other features disabled. Case is used to recharge Pixel Buds 2a. Use of other features will decrease battery life. Battery life depends on device, features enabled, usage, environment, and many other factors. Actual battery life may be lower.
- 9 Requires Pixel Buds 2a to be connected with Fast Pair to a device running Android 9 or newer, with location history enabled. Devices sold separately.
- 10 Requires compatible device (sold separately) to have been previously paired with Pixel Buds 2a.
- 11 Requires earbuds and case to be nearby and connected to compatible device.
- 12 These recycled materials are at least 41% of product based on weight.
- 13 Based on retail packaging (excluding adhesive materials and required plastic stickers) as shipped by Google. To meet the request of some retail partners, stickers and/or security tags are applied to some packaging variations and may contain plastic.
