

# EVOLTA NEO

[www.panasonic-batteries.com/EVOLTANEO](http://www.panasonic-batteries.com/EVOLTANEO)

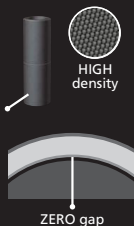

## TECHNICAL INFO

### CONVENTIONAL METHOD

### EVOLTA NEO

The density of EVOLTA NEO increased by adopting a high-density compacting method, which results in a longer peak performance and a greater lifespan of the battery.

The gap between the draw & ironing can be reduced to zero, thanks to precise manufacturing. This has improved the discharge efficiency.

## BENEFITS

### HIGH PERFORMANCE

A more efficient discharge thanks to precise manufacturing for reducing the gap between the draw and ironing.

### PANASONIC UNIVERSE

From television to camera, Panasonic always brings the best. Now we bring you our best alkaline battery.

### GREATER LIFESPAN

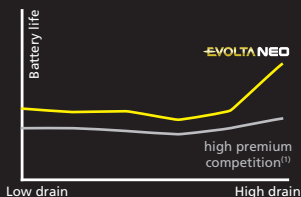

Enjoy at least 10%\* increase in battery longevity thanks to an increase of the compact fine particles' density, and a 20%\* increase when storing for a long period.

### MORE SAFE

New silver compounds absorb gas in case of overcharging. The amount of gas emission decreases for 30%.

## PERFORMANCE COMPARISON

Panasonic internal IEC testing 2018

<sup>(1)</sup> High premium competition = average of highest quality batteries of competition

Thanks to the technical improvements EVOLTA NEO batteries perform better than any battery.
