3D Entrance – augmented reality app for visualising physical access systems

Ennepetal, 11.02.2020 – The augmented reality app "3D Entrance" from dormakaba enables users to visualise design options for an existing façade with revolving and circular sliding doors or even entrance areas with interlocks and turnstiles from dormakaba by integrating desired products directly into an image of the current entrance. This allows existing entrance areas to be virtually fitted out with current products from dormakaba.

This then creates a realistic impression of how the selected door fits into the actual surroundings. To do this, the selected product is configured, e.g. its height, width, surface colour, and placed in perspective in the camera image or snapshot of the entrance in question. The resulting image can then be saved and sent.

The app is available for iOS tablets (iPad Air 2 upwards) and phones (iPhone 6 upwards) and Android devices in the App Store.

Caption:

With the augmented reality app "3D Entrance" from dormakaba, revolving and circular sliding doors can be virtually integrated into existing façades.

Disclaimer

This communication contains specific forward-looking statements including, but not limited to, statements that use the words "believes", "assumes", "expects" or wording to that effect. Such forward-looking statements are made based on assumptions and expectations which the company deems justifiable but which could in future be proven to be false. These statements should be treated with caution as they are naturally subject to known and unknown risks, uncertainties and other factors which could lead to the actual results, financial position, development or performance of the company and/or group deviating considerably from the predictions made in these statements, whether explicit or implicit. These factors include, but are not restricted to:

- the general economic situation,
- competition with other companies,
- the effects and risks of new technologies,
- the company's ongoing capital requirements,
- financing costs,
- delays in the integration of acquisitions,
- changes in operating expenses,
- fluctuations in exchange rates and raw materials prices,
- attracting and retaining skilled employees,
- political risks in countries where the company operates,
- changes to the relevant legislation,
- realisation of synergies
- and other factors named in this communication.

Should one or more of these risks, uncertainties or other factors materialise, or should one of the fundamental assumptions or expectations prove to be false, the results could deviate significantly from those stated in this document. In light of these risks, uncertainties and other potentially influential factors, the reader is requested not to place undue reliance on these forward-looking statements. The company assumes no obligation beyond that which is legally stipulated to continue to update or revise such forward-looking statements, or to adapt them to future events or developments. The company would like to point out that past results are not accurate indicators of future results. Furthermore, it is important to note that interim results should not be automatically taken as indicative of end-of-year results. Readers are advised to consult an independent financial adviser.
