

## **SENNHEISER SHOWS TEAMCONNECT CEILING 2 AT 2020 MICROSOFT TOUR LONDON CONFERENCE**

***London, February 4, 2020*** – Audio specialist Sennheiser showcased its TeamConnect Ceiling 2 microphone at the Microsoft Ignite The Tour London conference, which took place at the ExCel London between January 16 and 17. TeamConnect Ceiling 2 is certified by Microsoft as a solution for Microsoft Teams Rooms complete with a Microsoft-certified DSP.

The company showcased TCC 2 on the show floor offering live demos to the attendees so they could listen to the ceiling array microphone in action. TCC 2 ceiling mic, Sennheiser's flagship A/V conferencing solution, employs automatic adaptive beamforming technology, providing the speaker with unprecedented freedom to move about the room. Using 28 individual, omnidirectional Sennheiser KE10 pre-polarized condenser microphone capsules, the system automatically focuses on the voice of the speaker in a meeting, regardless of where they are located. For integrators and AV professionals, it is easy to install and does not require any ongoing maintenance. Several TCC 2 ceiling microphones can be combined to serve large meeting rooms.

The ceiling mic can be used together with existing analogue audio equipment as well as integrated into fully digital systems, where it can be controlled and monitored via the IP network. TeamConnect Ceiling 2 supports Power over Ethernet (PoE), Sennheiser Control Cockpit, Dante Domain Manager and third-party control solutions such as the Crestron control platform.

“The show was absolutely phenomenal and we saw a lot of interest in our products,” said Inesh Patel, Sennheiser’s Channel Sales Manager - Pro Audio Solutions. “It was great to have such interest from the IT field and to be able to show them our BizCom offerings.

“Doing live demos of TeamConnect Ceiling 2 is a must for us at shows. People are thrilled when they experience crystal-clear audio whilst retaining complete flexibility and freedom in the meeting room environment, without being chained down and restricted to a certain distance to the microphone or a set zone.”

### **About Sennheiser**

Shaping the future of audio and creating unique sound experiences for customers – this aim unites Sennheiser employees and partners worldwide. Founded in 1945, Sennheiser is one of the world’s leading manufacturers of headphones, loudspeakers, microphones and wireless transmission systems. Since 2013, Sennheiser has been managed by Daniel Sennheiser and Dr. Andreas Sennheiser, the third generation of the family to run the company.
