

FACTS & FIGURES 2013

TOGETHER
FOR BETTER

Reynaers Aluminium owes its leading position to its constant investments in the **research and development** of market-oriented products. Besides **technical information**, Reynaers also offers **personalised marketing tools**. We advise and inspire our different target groups via different kinds of printed and digital documents as well as events and fairs. Thanks to an **advanced logistical approach** the company succeeds in supplying its customers very efficiently. Reynaers satisfies the international **ISO 9001:2008 quality standard**.

Lead architect: Ron Arad - Executive architect: Jaspers & Evers

Our success is the result of a close collaboration with our partners. Our projects are living proof of the synergies we have created with investors, suppliers, project developers, architects and fabricators all over the world. We want our clients to know that they can count on us, today and in the future.

To support the internal and external exchange of knowledge and information amongst all stakeholders we have created the Reynaers Institute. It is an international meeting place and source of inspiration that motivates us to join forces and work on the building vision of the future.

You can visit the Reynaers Institute for trainings and seminars, general company visits, demonstrations of machines and testing.

SERVICES

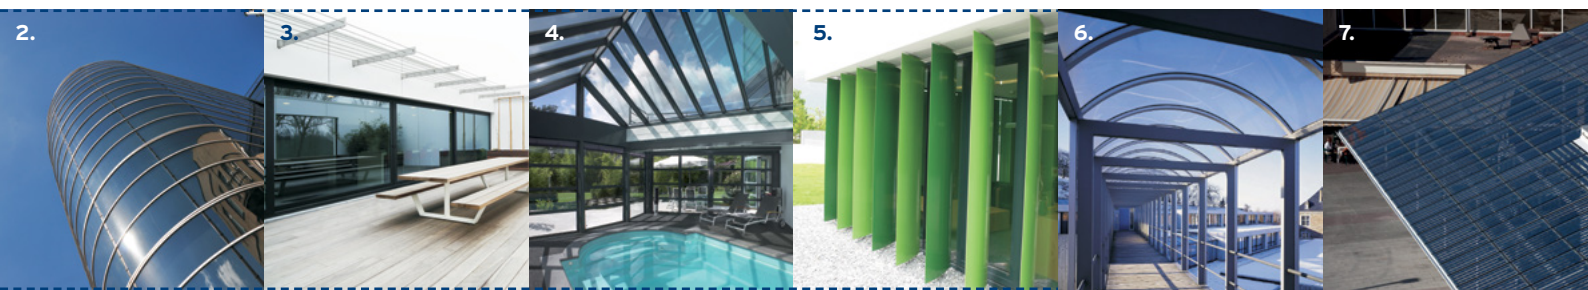

Reynaers Aluminium continuously listens to the requirements and wishes of our partners. We aim to provide them with all the means to work as well and efficiently as possible.

A large range of tools and services is at our **customers'** disposal:

- Up-to-date technical and commercial information on our website and Extranet
- Technical trainings, theoretical as well as practical
- Machines and tooling
- Advice in the automation of the production line
- Software packages for price calculations, designs, insulation calculation, orders, etc.
- Sales support (commercial trainings, showroom modules, brochures, promotional material, etc.)

We support **architects** with the following services:

- Up-to-date technical and commercial information on our website and Extranet
- Architectural magazine 'Report' for inspiration
- Reynaers Consult, a team of people that can give advice during the design process
- Creation of bespoke solutions
- Architect catalogues with info about available solutions
- Organisation of seminars

PRODUCTS

Reynaers systems are processed by fabricators and construction companies into windows, doors, sliding modules, conservatories, façades, skylights, sunscreening systems and solar solutions. We provide solutions for all types of architectural styles for both the residential (new build and renovation) and project market (apartments, office buildings, hotels, shopping centres, public buildings, schools, hospitals, airports etc.).

1. Windows and doors

A wide variety of insulated and non-insulated systems, from which windows and doors can be produced in all sorts of forms and formats, from very small to very large. The systems provide the right solution for various requirements including openings, insulation, comfort and security. Windows can be fitted with standard handles or handles from our new high-end Purity range.

2. Curtain walls

A complete range of façade systems, designed to meet all demands of contemporary architecture. From structural glazing to unitised systems that enable large assemblies and glazed elements to be prefabricated and easily installed on site.

3. Sliding systems

From the lightest sliding window to the largest lift-and-slide door, there is a system that fits every application. Big dimension sliding systems with a low threshold blur the boundary between the indoors and outdoors and bring the outside in.

4. Conservatories

Roof lights, glazed domes and conservatories. Every system offers an optimal technical solution, from simple glass roof constructions to complex conservatories and skylights.

5. Sunscreening systems

Horizontal and vertical external shading systems that add an aesthetic dimension and provide protection against solar overheating and glare to every building.

6. Complementary systems

Besides the traditional product groups, Reynaers offers a number of systems designed for a specific application, including balustrades, gates, ventilation systems, shutters and insect screens.

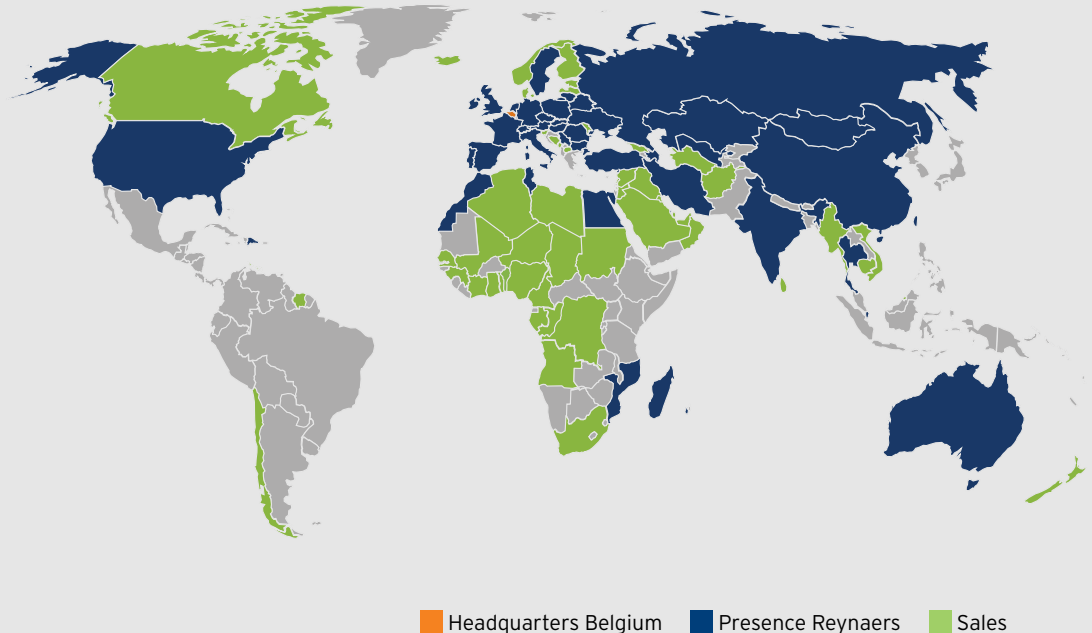

7. Solar systems

Reynaers can present a full range of BIPV (Building Integrated Photovoltaics) solutions. They are designed to match the different parts and sides of a building and guarantee maximum yield for each panel. All our products can handle all 3 types of PV panels: mono and poly crystalline and amorphous cells.

INTERNATIONAL PRESENCE

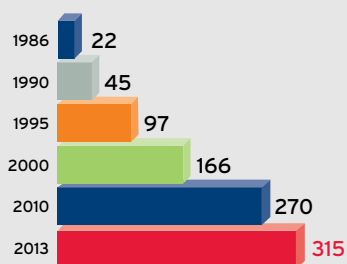

Reynaers Aluminium, established in 1965 is currently present in more than 35 countries and exports to more than 60 countries worldwide.

IMPRESSIVE GROWTH

The Reynaers group has experienced massive growth in the last 25 years. Having grown more than 200% over the last 20 years. Reynaers is considered by all players in the industry as one of the leaders in its business. In 2013 the Reynaers group achieved a turnover of 315 million euro and has 1500 employees throughout the world.
