ŠKODA ENYAQ COUPÉ iV: World premiere on 31 January

- › Teaser video offers a glimpse of the new coupé variant of the all-electric SUV
- › ENYAQ COUPÉ iV has best-in-class drag coefficient of c_d 0.234
- › Official presentation on 31 January 2022

Mladá Boleslav, 15 December 2021 – ŠKODA AUTO will be presenting its new ENYAQ COUPÉ iV on 31 January 2022. A teaser video offers a first glimpse of the Czech carmaker's new, all-electric top model, highlighting its outstanding aerodynamics. With a c_d of 0.234, the ENYAQ COUPÉ iV has the best drag coefficient in its class, making it particularly efficient to drive.

Like the ENYAQ iV, the new ŠKODA ENYAQ COUPÉ iV is also based on the Volkswagen Group's Modular Electrification Toolkit (MEB). With a drag coefficient of c_d 0.234, the elegant coupé sets the benchmark in its segment and improves on the already excellent value of the ŠKODA ENYAQ iV, thanks in part to the new body shape. From the B-pillar, the roofline of the ENYAQ COUPÉ iV slopes gently towards the rear, merging into the tailgate and culminating in a sharp breakaway edge. The teaser video also reveals the ENYAQ COUPÉ iV's Crystal Face, with 131 LEDs illuminating the distinctive ŠKODA grille.

The world premiere of the new ŠKODA ENYAQ COUPÉ iV will be held on 31 January 2022.
