Welcome to February at IKEA

This launch is about living a conscious and mindful lifestyle that is close to nature. Whether you are living in the countryside or the city, you can bring nature to the home with a bit of greenery and a wabi-sabi attitude.

Modern furniture is balanced with traditional, rustic treasures, mirroring our desire for both creativity and innovation, as well as sustainability and humbleness. This balance is also seen in the natural colour palette where fresh hues are contrasted with deeper tones.

We're welcoming furniture that is good for your health, as well as the environment. Our new sit/stand support encourages a healthy sitting habit while you work. Sustainability is big this launch, from air-purifying curtains made from recycled PET bottles to lamps and accessories made from natural materials. We're also offering a range of beautiful textiles in hues of green and verdant patterns. You can renew the kitchen with a bold red front, and a carrying tray made of bamboo.

Overall, this launch is about creating peace of mind in the home by having a meaningful relationship with the objects we surround us with. We take extra care of our belongings, ourselves, and nature, knowing that we are all connected.

KORNSJÖ cabinet with mirror

Say hello to KORNSJÖ, a cabinet and dressing table that is just perfect for entryways. Or any room for that matter! It has plenty of storage options for bags, shoes and little knick-knacks that need hiding (or showing off). Above the cabinet is a smooth running drawer with a pull-out stop. With its adjustable feet, it can stand steady also on uneven floors. Just make sure to secure it to the wall with the enclosed safety fitting.

Its large round mirror immediately brightens the room and is great for one last look before heading out. Grab your keys and jacket, and don't forget to smile! Yes, you're ready to face the day.

PRAKTBRÄCKA quilt cover

PRAKTBRÄCKA is literally a work of art. The floral pattern on this beautiful quilt cover and pillowcase is inspired by 18th century patterns from the historical Musée de l'Impression sur Étoffes (Museum of Printed Textiles) in France.

Even better, it is made from 100% cotton from more sustainable sources. You can enjoy the softness and cosiness of PRAKTBRÄCKA, knowing that the cotton has been grown with care.

PH167596.JPG PRAKTBRÄCKA quilt cover and 2 pillowcases 49.95 004.497.02

Romantic and subtle at the same time, PRAKTBRÄCKA has embroidered details and fabric-covered buttons that keep the quilt and pillow in place.

A great way of highlighting this piece is by placing it in a mix of striped fabrics and covers. This way, the cushion pops out and becomes the star of the show.

TJILLEVIPS baskets

Get cosy with these easy-to-love baskets. TJILLEVIPS is a collection of sustainable handmade baskets woven from six different types of plant fibres: bamboo, rattan, seagrass, banana fibre, poplar and jute. Handcrafted by skilled artisans, each piece is unique with its natural colour shifts and expression.

According to Sara Ottosson, who has worked with natural fibres at IKEA for more than ten years, the varying colour shifts makes the material more interesting: "They come alive. There's beauty in the irregularity and that someone has spent time to structure and create unique everyday objects of the materials."

What's truly wonderful about TJILLEVIPS is that they create jobs for skilled craftspeople. And by using natural, fast-growing plant fibres, it is a sustainable choice. Simply put, it's an easy and caring way – both for people and planet – to organise, decorate and bring nature into your home.

Seagrass is an excellent natural material. Its fast-growing quality makes it a sustainable choice.

PE775069.JPG

The different materials used in TJILLEVIPS have three things in common. They are fast-growing, thus sustainable, they are perfect for handmade products, and they generate jobs for skilled artisans.

These handwoven baskets are made from bamboo – a fast-growing and renewable material.

PH167571.JPG TJILLEVIPS basket 9.99 W25×D35, H20cm. 304.393.58

This basket is made from the inner part of the rattan skin that is usually just used for energy recovery. The complicated weaving technique takes a lot of skill to make.

PH167572.JPG TJILLEVIPS basket 9.99 W25×D35, H20cm. 304.393.58

PH167567.JPG TJILLEVIPS basket 19.95 Ø45, H30cm. 004.394.87

The basket on the right is made of poplar, while the one of the left is made of rattan. Did you know that the different colours of plant fibre depend on where the plants grow? For instance, rattan from Indonesia is lighter than in Vietnam. It also depends on what time of the year they grow and the conditions when they are harvested.
