THE DIRTY SECRETS OF NETWORK FIREWALLS

Results of an independent survey of 2,700 IT Managers in 10 countries, in organizations of 100-5000 users.

DIRTY SECRET 1

FIREWALLS ARE FAILING TO DELIVER THE PROTECTION ORGANIZATIONS NEED

‣ 16 infected devices per month, on average.
‣ #1 desired firewall improvement is better protection.

DIRTY SECRET 2

IT MANAGERS CAN'T TELL YOU HOW 45% OF THEIR BANDWIDTH IS CONSUMED

‣ 45% network traffic is going unidentified.
‣ This leads to multiple areas of concern including security, productivity, accountability, legal liability and compliance and RoI.

DIRTY SECRET 3

INEFFECTIVE FIREWALLS ARE COSTING YOU TIME AND MONEY

‣ 3.3 hours – average time taken to identify, isolate and remediate infected machines.
‣ 7 days – time lost every month to fixing infected devices.
