

SilentPower Offers the Power to Transform at InfoComm 2025

Debut Appearance Led by New National Sales Manager Jason Dominique

Southport, UK, June 8, 2025— [SilentPower](#), born from two decades of innovation at AMR and iFi audio, is set to make its debut at InfoComm 2025. Built on a legacy of clean power and data solutions, SilentPower became a standalone brand dedicated to enhancing performance across Commercial, DataComm and Residential Pro AV systems.

Jason Dominique, the newly appointed National Sales Manager, will lead SilentPower's InfoComm presence. *"This is the first time SilentPower and iFi audio are exhibiting at InfoComm",* says Dominique. *"Our solutions are a perfect fit for Commercial, DataComm, and Pro AV industries where clean power and pristine audio are essential."*

SilentPower will showcase their latest innovations at Booth 7573:

- **OMNI LAN** - an optically isolated AV network switch, designed to eliminate network noise at the source and then redistribute a regenerated LAN signal to your entire network.
- **LAN iPurifier Pro** - an ethernet filter with optical isolation that maximises signal integrity and efficiency for a singular critical component, such as a network streamer or server.

"I am excited to be participating here," Dominique continues. *"Many integrators and system designers demand uncompromising sound and performance. We help take system projects to a whole new level. With my background in both Commercial and Residential AV, I understand the challenges – and where we can truly enhance the experience."*

Book your appointment now between June 11-13, located at the Orange County Convention Center, West Building, Orlando, Florida, to speak with the team and get hands-on with SilentPower's newest offerings, including:

AC Power Solutions

- **AC iPurifier**— parallel mains conditioner that eliminates electromagnetic and radio-frequency interference.
- **GND Defender**— intelligently detects a ground loop and will cut the ground for that component, without altering user or equipment safety.
- **DC Blocker**— in-line IEC accessory that eliminates mechanical transformer hum from power amplifiers, speakers, and more.

SilentPower

USB and Network Enhancers

- **iDefender+, iDefender Max, iSilencer Max, iSilencer+**— available in USB-A and USB-C formats; eliminate ground loop noise and electrical interference in computer-based systems.
- **LAN iSilencer**— enhances network sound and stability for home and office setups through interference minimisation and RF filtering.

Power Supplies

- **iPower Elite**— flagship power supply delivering ultra-clean, battery-like performance to streamers, DACs, and amplifiers.
- **iPower X**— high performance, ultra-low-noise power supply with greater current output.
- **iPower 2**— entry-level but best-in-class for silent, stable power delivery.

Also featured are iFi audio's acclaimed products - NEO iDSD 2, NEO Stream, ZEN Can Studio, ZEN Blue 3, ZEN DAC 3 and ZEN Phono 3.

About SilentPower & iFi audio

SilentPower is the sister-brand of iFi audio and is headquartered in Southport, UK. The two brands respectively design and manufacture innovative AV system solutions and portable, desktop and lifestyle audio products. Combined in-house hardware and software development teams and a 'music first' approach enable SilentPower and iFi to create advanced products that deliver new levels of design, functionality and performance at their respective price points. Since iFi's formation in 2012, its products have earned many awards around the world, helping it to become one of the fastest-growing brands in its field. For more information, please follow this link, <https://www.silentpower.tech/>.

iFi audio is the sister-brand of Abingdon Music Research (AMR) and is headquartered in Southport, UK. The two brands respectively design and manufacture portable, desktop and lifestyle audio products and high-end hi-fi components. Combined in-house hardware and software development teams and a 'music first' approach enable iFi and AMR to create advanced audio products that deliver new levels of design, functionality and performance at their respective price points. Since iFi's formation in 2012, its products have earned many awards around the world, helping it to become one of the fastest-growing brands in its field. www.ifi-audio.com
