

## PRESS RELEASE

# REPA Presents the New Version of its App Designed to Speed Up Field Maintenance and Repairs

For technicians who want to save time and identify spare parts faster

Cesena, March 18, 2026

[REPA](#), Europe's leading distributor of spare parts for foodservice and refrigeration equipment, coffee and vending machines, and European division of Parts Town Unlimited, presents the new version of its REPA LF app, dedicated to professionals of the Italian, French and International markets.

The new version of the app makes it even easier for technicians and service centers to interact with REPA's extensive inventory of parts.

### Advanced Features for a Quicker Service

Make interventions in the field even smoother and maximize equipment uptime is one of the goals of REPA. To this end, key features have been improved, such as the smart barcode search. This feature allows users to find and add a part to cart by scanning the barcode on the label with their camera, thus reducing manual entry errors. Additionally, technicians can track shipments in real time and add all the parts they need for recurring maintenance to wish lists. Moreover, the mobile experience for the over 434,000 exploded views has been improved to facilitate quicker identification of the correct part.

### Users' Favorite Functionalities, Always at Hand

The app continues to offer all the most appreciated functionalities from the previous version, including brand-based search, manufacturer code lookup, product family search, dedicated sections for catalogues and gaskets, and more.

*"The release of the new version aligns perfectly with our commitment to offering technicians user-friendly technology to simplify their daily business," says Lucia Dolcini, Group E-commerce Director, who adds: "With new search functionalities and a redesigned user experience, the REPA LF app makes it even easier to find and identify the right part within our extensive database of 2,3 million parts. It really puts a world of parts in our customers' pockets."*

## How to update or install the App

**For customers already using the REPA LF app**, the new version is available by opening the app and choosing to update it.

**For new users**, the app is available here:
