- Varnishing

HOMOGENEOUS

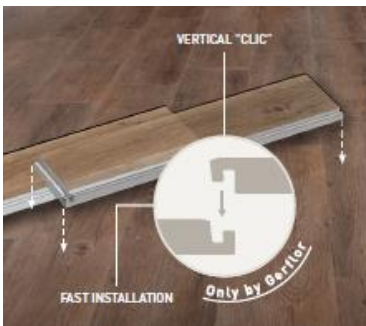

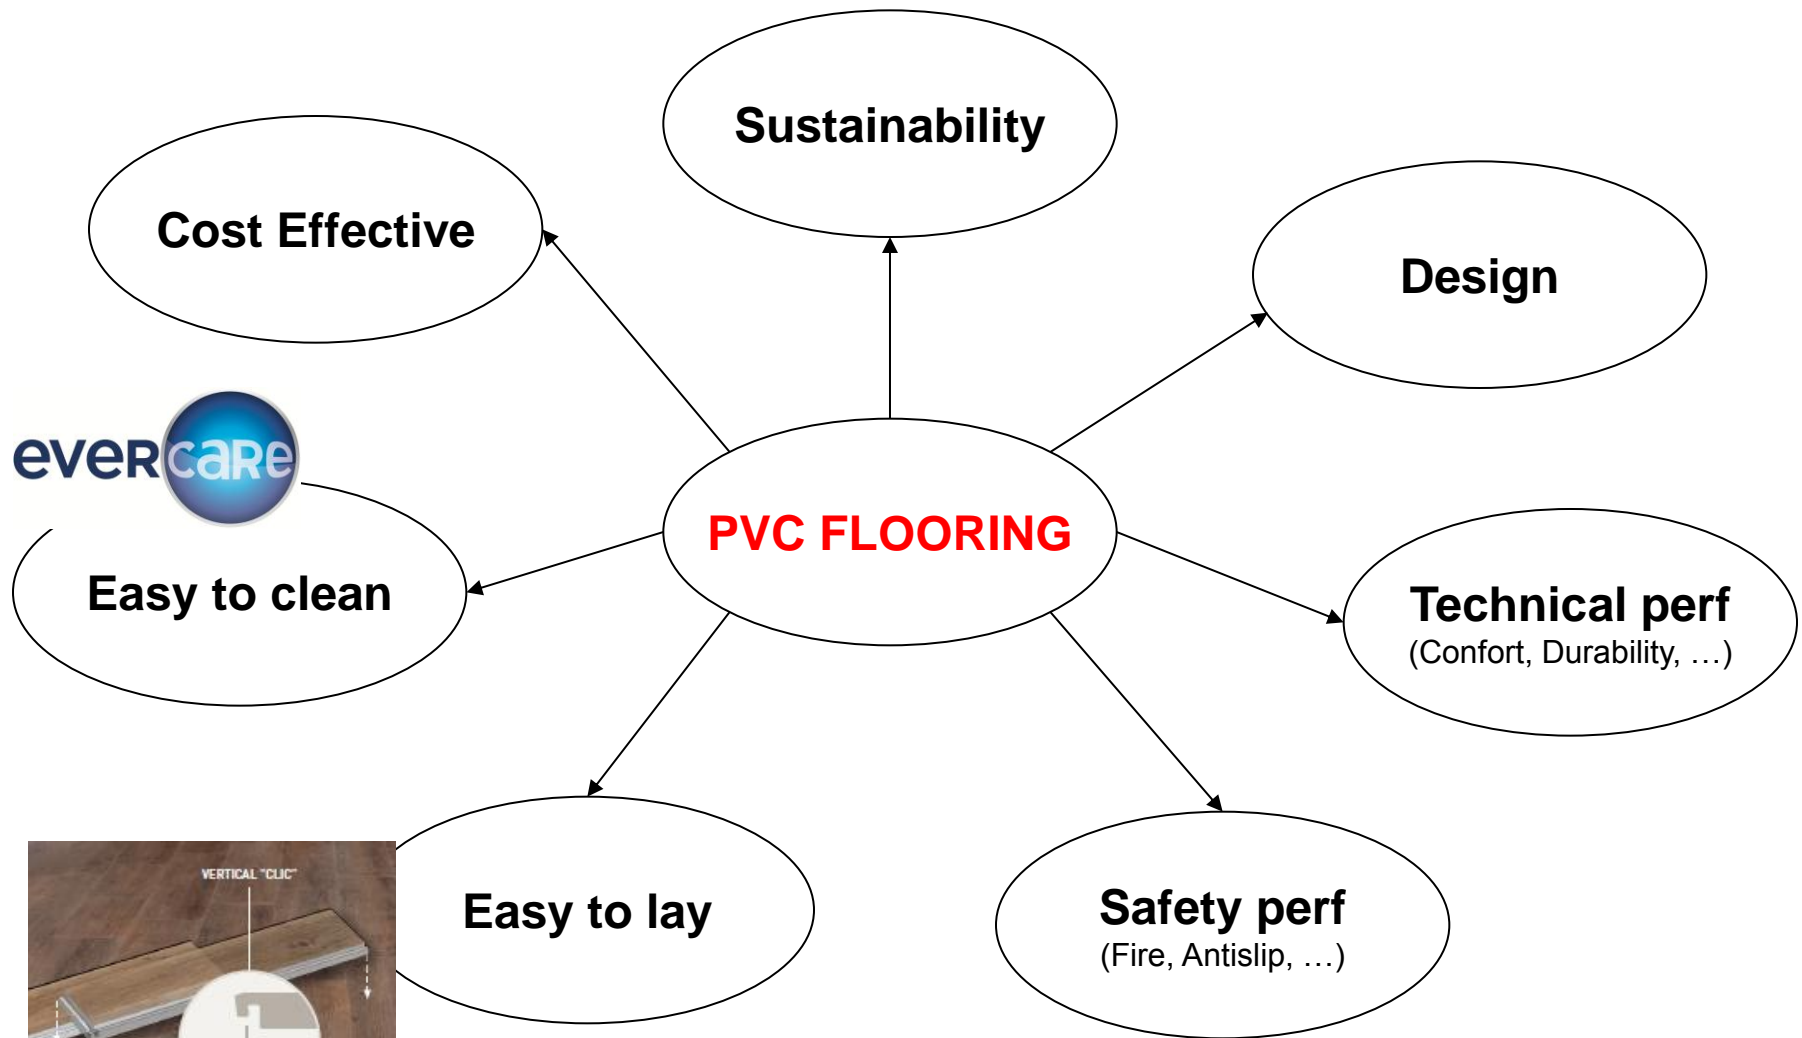

- Compounding + Calendering
- Extrusion / Pressing
- Varnishing

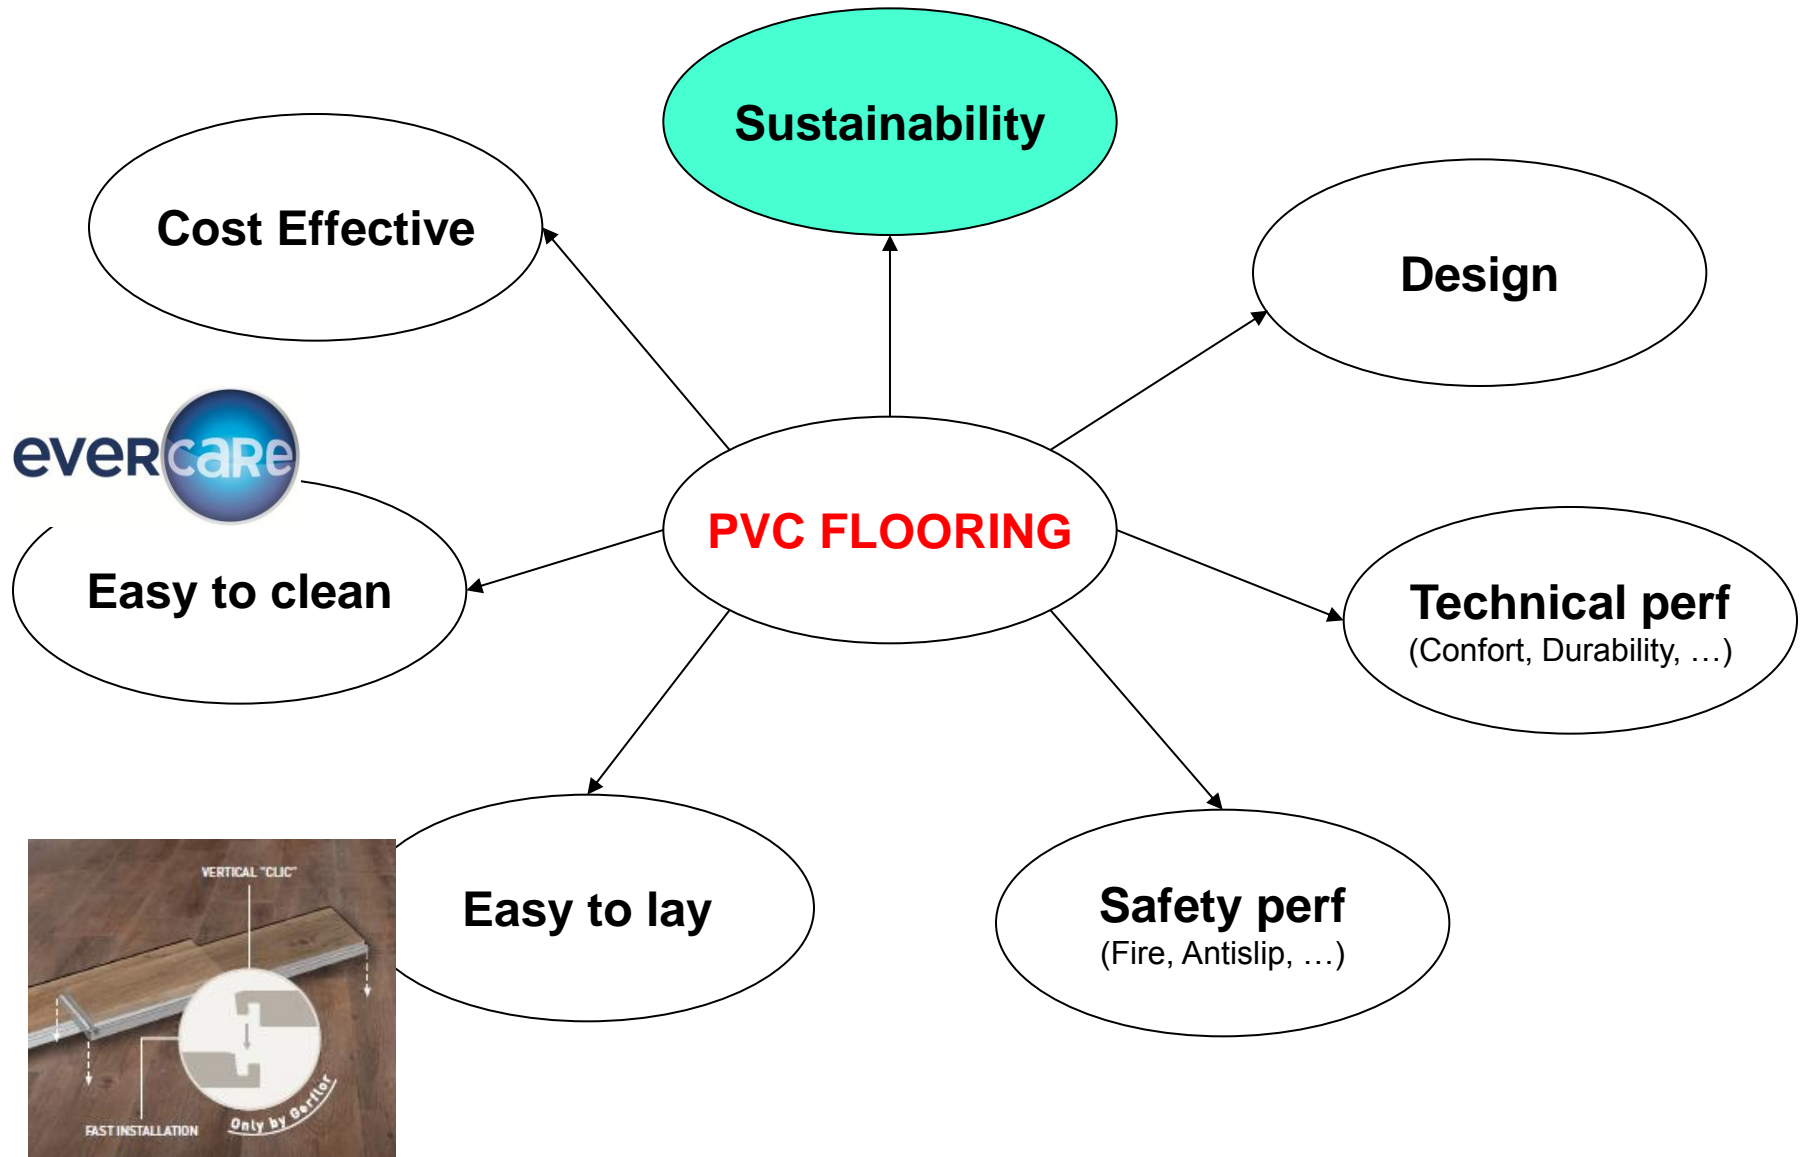

- ***Transformation of the thermoplastic PVC formulation into layers of regular thicknesses***

- ***Transformation of a plastisol paste into a compact or foam layer by heating at high temperature in an oven***

Main improvements for PVC FLOORING

► 1 – Raw Materials

► 2 - VOC

Health & Safety

► 3 - LCA

Life Cycle Analysis

► 4 – Recycling

Recycling

1 - Raw materials & Formulation

- No Heavy metals
- No solvent
- No formaldehyde
- No CMR 1-2 products

1.

PLASTIFIANT
100% ORIGINE VÉGÉTALE

1. MIPOLAM SYMBIOZ

75% de matières premières durables ou renouvelables.

2.

MATIÈRES PREMIÈRES
RAPIDEMENT RENOUVELABLES

2. SAGA² / SOLILIEGE

Dalle acoustique avec envers liège.

Mipolam Symbioz™

- ## Life
- Highest durability: T group
 - Very low VOC Emission
 - 100% recyclable

RAW MATERIALS

- 75% sustainable or renewable resources
- 100% bio based plasticizer

The lowest
environmental impact
at every stage
of the product life

INSTALLATION

- Highly flexible homogeneous flooring
- Easy to install & weld
- Welding rod: 100% bio based plasticizer

PRODUCTION

- Made in Germany
- ISO9001, ISO14001 and OHSAS 18001 certified factory
- 100% post manufacturing wastes recycled

TRANSPORT

- Product weight 20% lower than standard product
- All raw materials available within 350 km from production site

MIPOLAM SYMBIOZ™

[illegible]

INSTALLATION
Laying is the responsibility of the installer. Installation should be made in accordance with installation guidelines supplied and regularly updated by the manufacturer's Technical Department. Installation should be carried out in accordance with local standards. However, if the situation, fault, climate and the prior job require, when applicable the contractor must negotiate an effective Group 2 fire rating. The fire rating must be allowed in accordance with 30 hours prior to installation in a room containing or between 16-30°C. All rooms must be well ventilated after further mandatory drying.

MAINTENANCE
Maintenance should be carried out regularly to meet the appearance and durability of the floor. The floor covering should be maintained with regular sweeping and drying mopping using a neutral cleaner or a mild scrubber machine with an approved pad.

REPAIRS
Plaster walls, masonry walls, ceiling, ceilings, do not use mats with rubber backing and replace subfloor furniture base with those made of PVC or polypropylene.
Place mats of sufficient length or arrangements to reduce visible sources of dirt.
Bathing, showering, swimming, etc.

- Re-introduction in vinyl flooring (back layers)

LVT Product benefits

MAKES LIFE EASIER

- Easy to **transport** > modular format
- Easy to **install** > adhesive-interlocking-looselay
- Easy to **cut** > utility knife
- Easy to **clean** > soapy water

ALL USES

- **Water resistant**
- **Renovation** > Installation on different type of surface & thinner product than wood
- **3 levels of traffic** > from low to high

Gerflor **COMPLETE** offer

3 LEVEL OF **TRAFFIC**

0,3 > medium traffic

0,55 > high traffic

0,7 > very high traffic

4 INSTALLATION **TECHNOLOGIES**

- **INTERLOCKING**
- **SELF-ADHESIVE**
 - **LOOSELAY**
 - **DRY BACK**

Product Construction

Evercare® Treatment

Monolayer homogeneous
flooring, calendered

- Wide of sheet: 200 cm
- Length of sheet : 20 lm

Main product benefits

- **Unique and realistic designs:**

- Matt finishing
- Large palette of colours

Aestheticism and decorative range

- **Abrasion group T**

- **Antistatic**

- **Residual indentation (0,02mm)**

Durability and performance

- **Evercare™ surface treatment:**

- Obtained by UV laser cross-linking
- Ease of maintenance: no wax for life
- Avoids staining and soiling
- 30% savings on maintenance cost
- 15% less detergent and water use

Easy maintenance

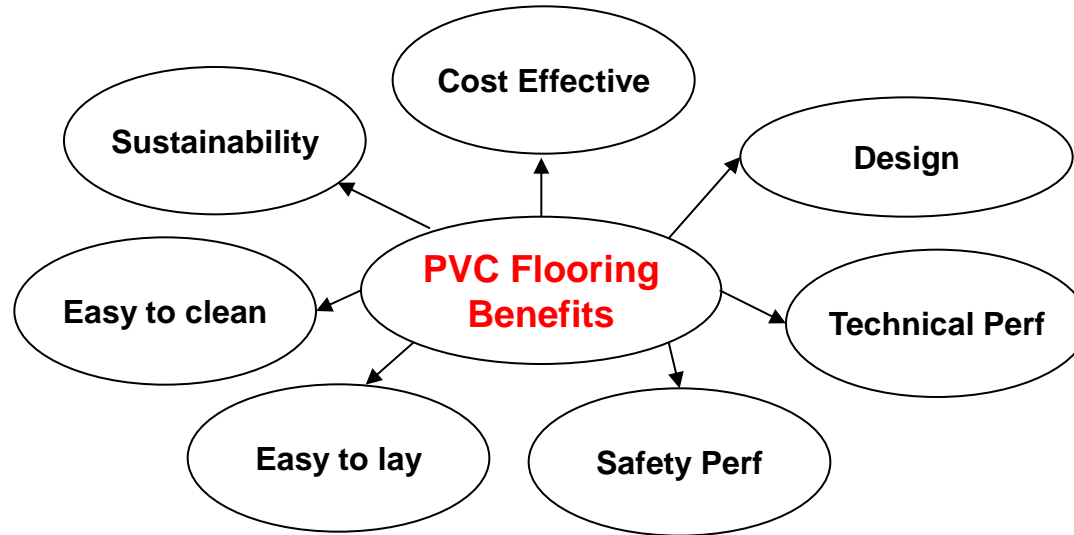

- **Indoor air quality: TVOC < 10 & 100% recyclable product**

- made from 100% bio-based plasticizer
- contains over 75% sustainable or renewable raw materials
