Batibouw 2022

**About the importance
to participate**

Batibouw 2023

Presenting what's
new

P5 – P 11 + Hall Astrid & Patio – 46235m²

14/03/2023 – 19/03/2023

500 exhibitors

*Today's
concern*

OUR THEME

This edition will inevitably be placed under the sign of alternatives for energy consumption, in order to help the builder and renovator of tomorrow to adopt the right reflexes in the current context.

Batibouw becomes more sustainable

Reduction of single-use

We try to reduce our ecological footprint by avoiding the use of single use items as much as possible. Therefore, there will no longer be any single use plastics in the Brussels Expo catering points and furthermore.

Use of sustainable carpet

Project	Sales m ²	PRODUCTION			RECYCLING		
		Energy (kWh)	Water (litres)	CO2 eq (tonnes)	Recycled tonnes	Recycled m ²	Recycled CO2
Batibouw	7,000	1,703	1,687	1.81	2	7,000	1.34

Reduced use of energy

As well as in our offices, we turn the heating down in the exhibition halls. The heating will be set at 19°C, two degrees less than before. The general lighting will be switched off.

Reusable materials for booth construction

We analyse the materials used to build our booths and choose, in collaboration with our partners, materials that are more sustainable and/or can completely be reused for new booths or materials.

Less waste and better sorting

We actively work on the reduction of the waste generated at our fairs. The waste that we cannot avoid, will be sorted as rigorously as possible.

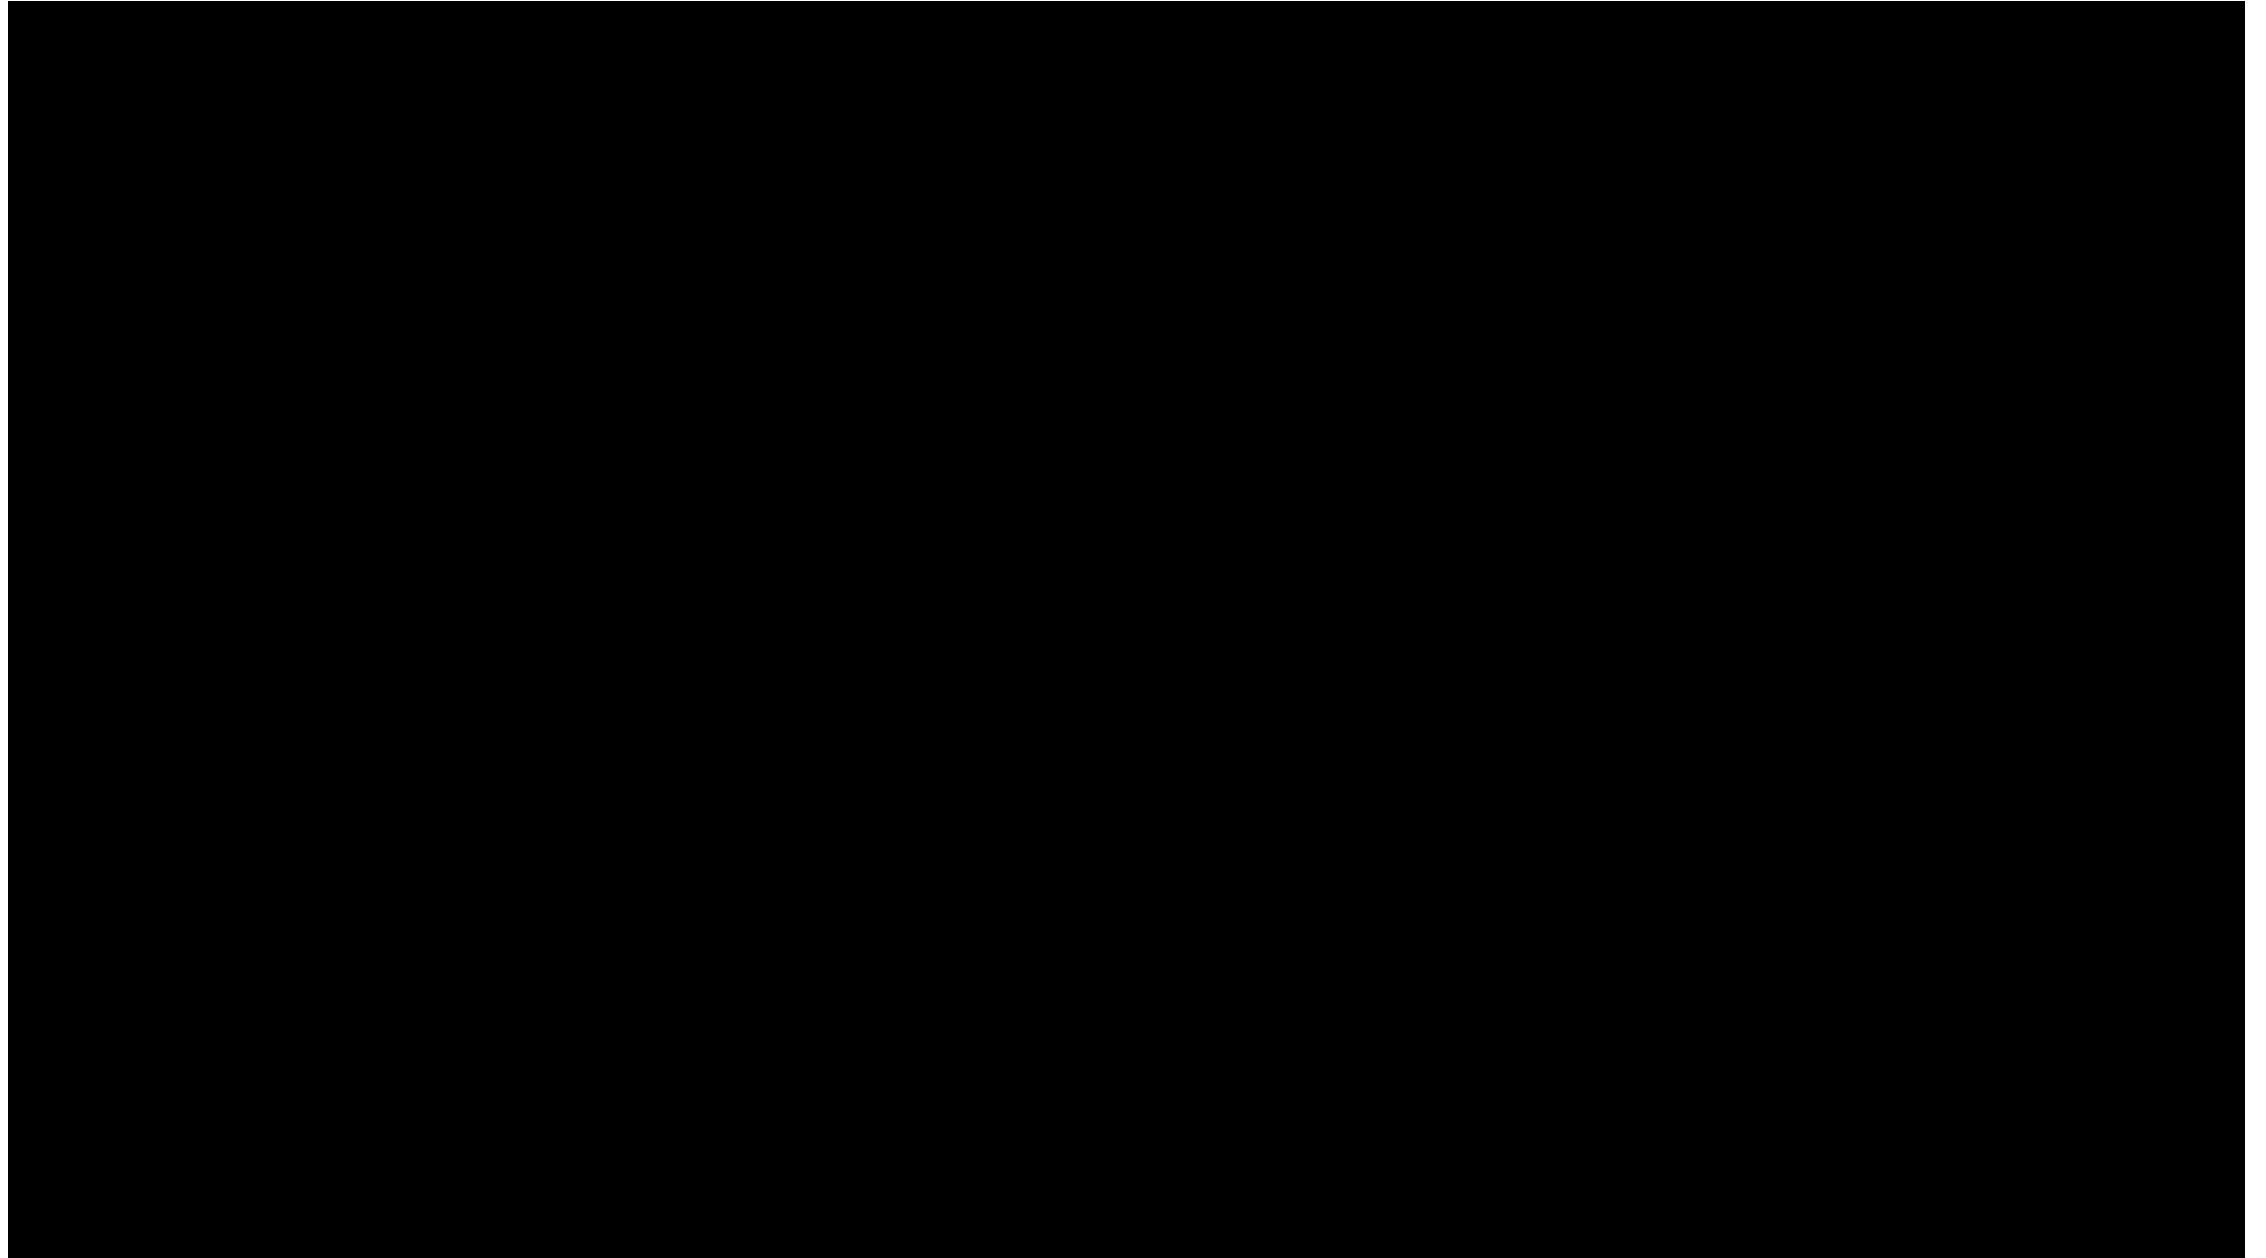

Use of a chart for exhibitors to assess their efforts to become more sustainable
Chart based on following action points :

- 1. Sustainable materials**
- 2. Modularity & Flexibility**
- 3. Water**
- 4. Indoor & outdoor climate**
- 5. Local production**
- 6. Zero waste**
- 7. Renewable energy**
- 8. Biodiversity enhancement**
- 9. Inclusiveness**
- 10. Functional optimisation**
- 11. Mobility**
- 12. Digitalisation**
- 13. Innovative circular business model**
- 14. CO2eq emission**

BATIBOUW 2023

Creating a seamless
visitor experience

Flex Living

FLEX LIVING

1000 M²

Whole zone dedicated to another way of living,
the future of living.

Urban style
Various types of (new) homes
Tiny houses, container houses,...

Batibouw Matchmaking

MATCHMAKING ZONE

528M²

Experts, professionals, consultants

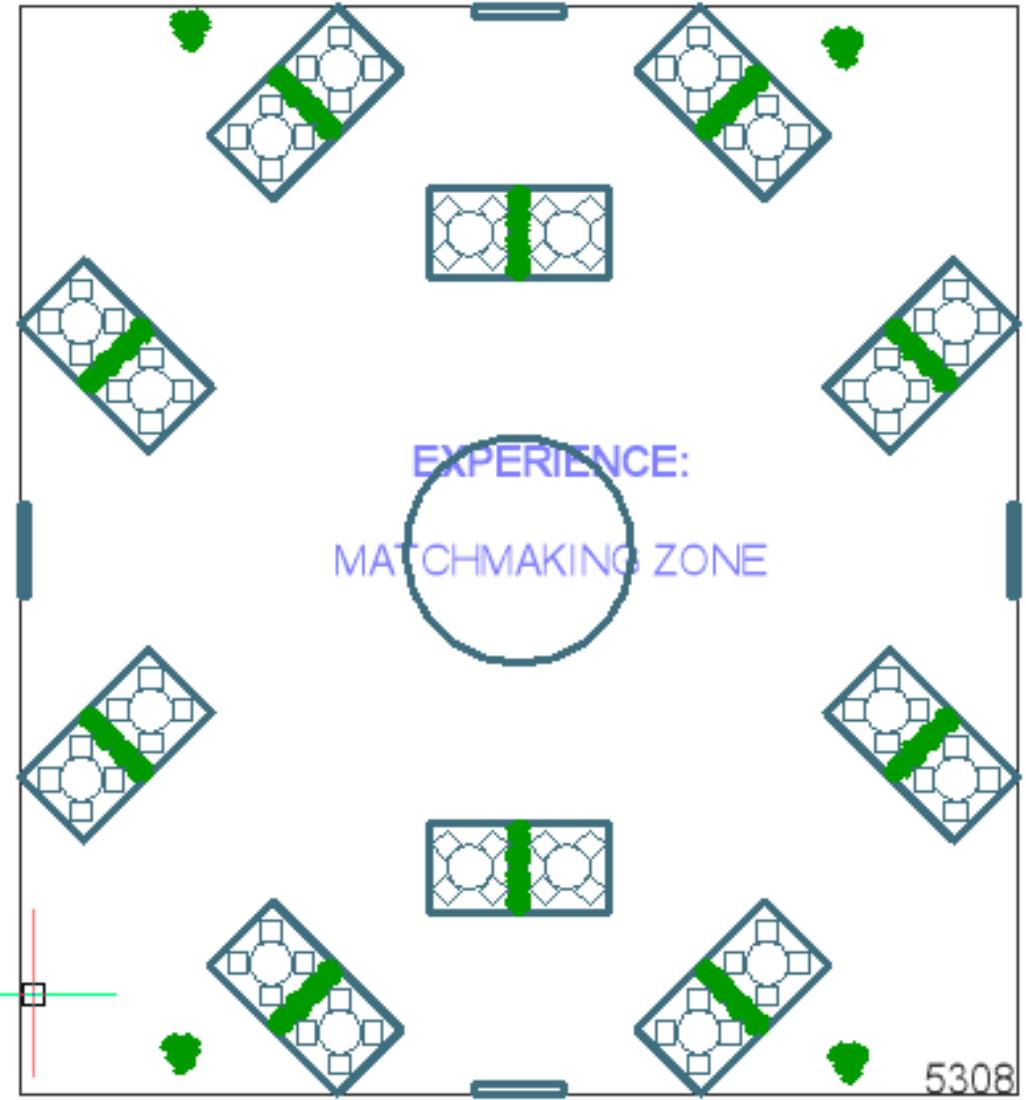

One-to-one answers

Sessions of 1 hour

themes:

Energy usage, color advice, storage tips,
indoor gardens, moss walls, mortgage loans,
conflicts with contractors, neighbors, ...

Batibouw Academy

ACADEMY ZONE

391M²

Atrium for 120 people

Workshop & demo spaces
of 12m² and 24m²

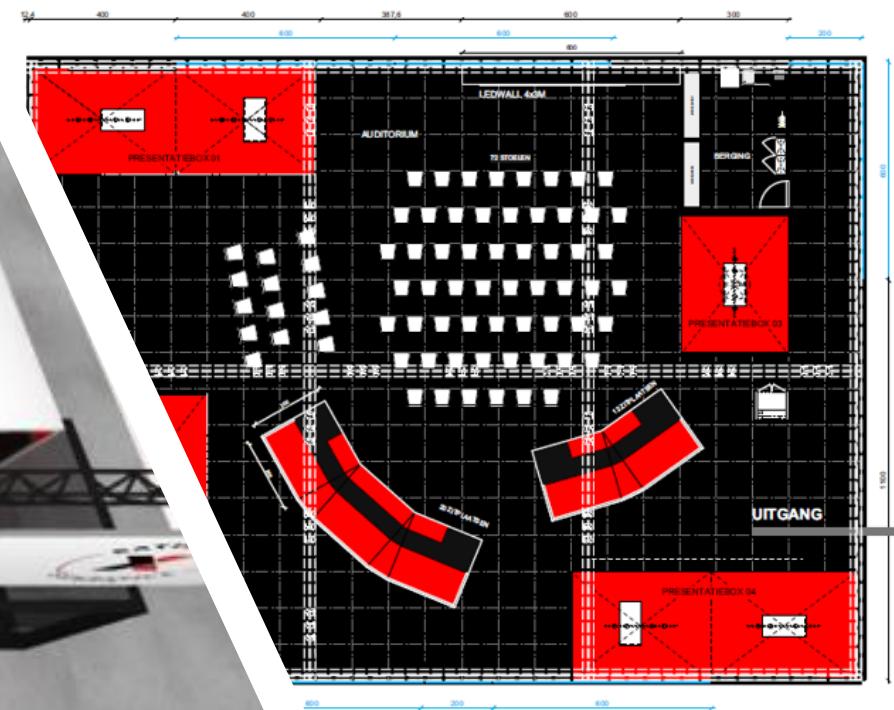

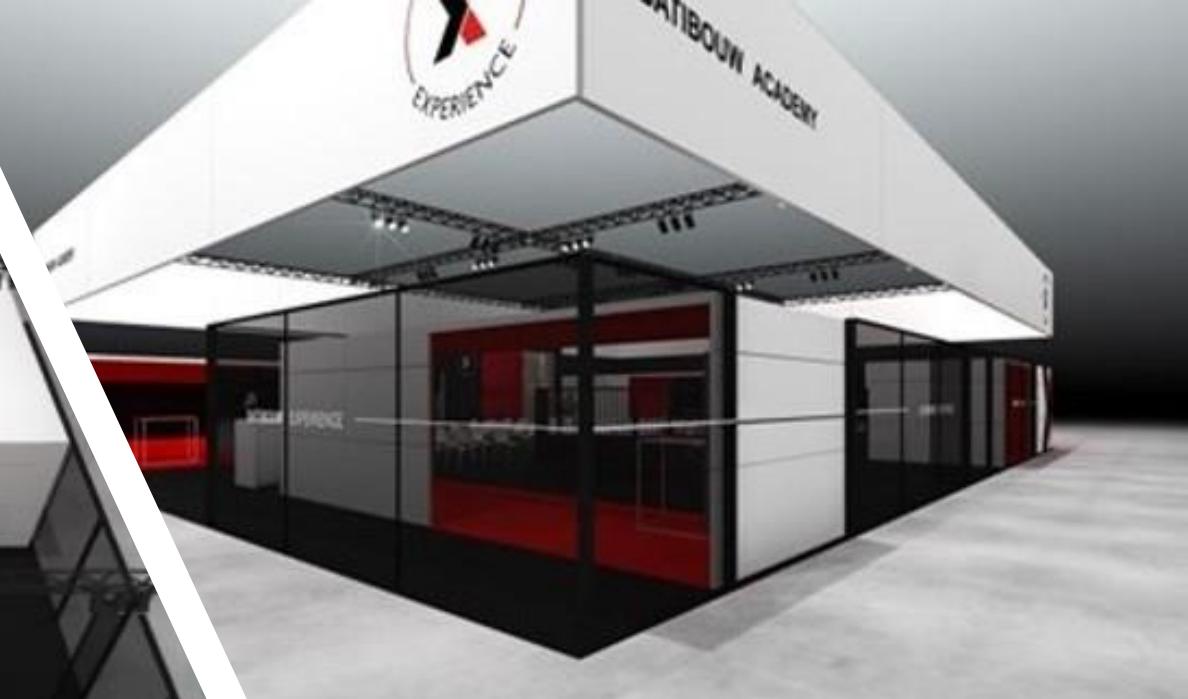

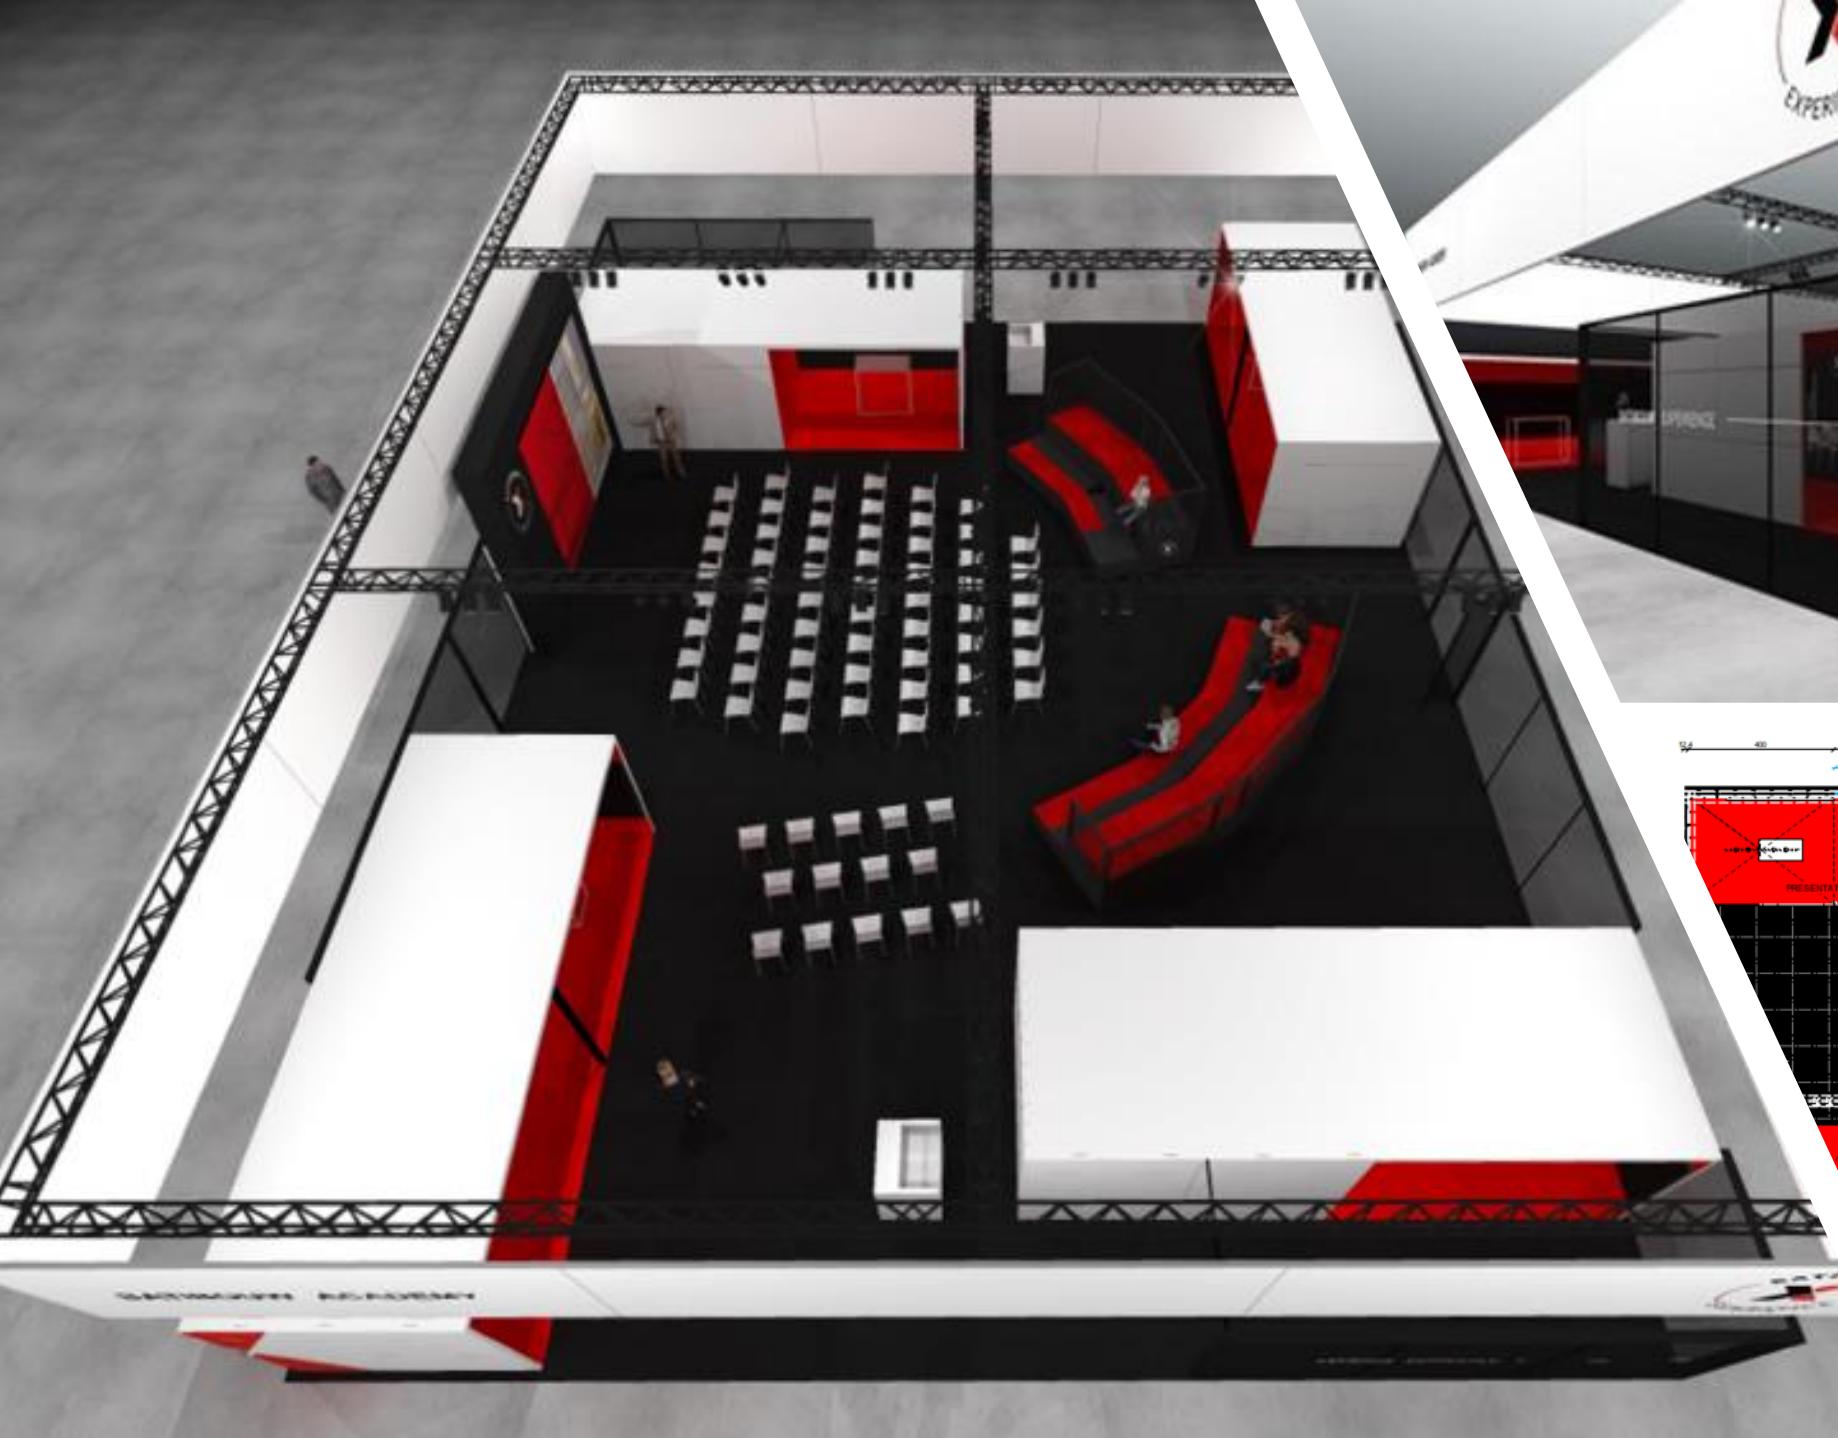

Conferences: Socially relevant topics that appeal
to a wide audience

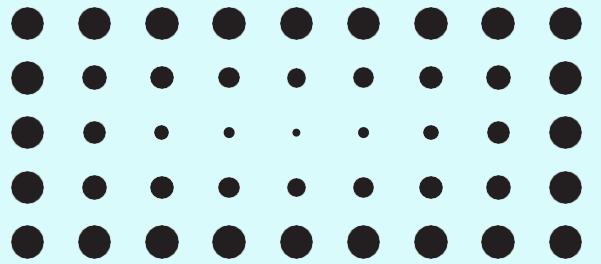

Demos: product launches, new techniques

Workshops: interactive sessions with materials

Inhoud – Contenu

• 1. Woningmarkt

- Stijgende kosten
- Bouwen en renoveren blijven de moeite
- Hinderpalen woonplannen
- Een aantal succesmarkten

2. Energie

- Moteurs pour la rénovation
- Moteurs pour la rénovation énergétique
- Type de rénovation énergétique
- Financement de la rénovation énergétique

3. Maatregelen

- Verlaagde btw sloop-renovatie
- Verlaagde btw zonnepanelen, zonneboilers en warmtepompen

4. Conclusions

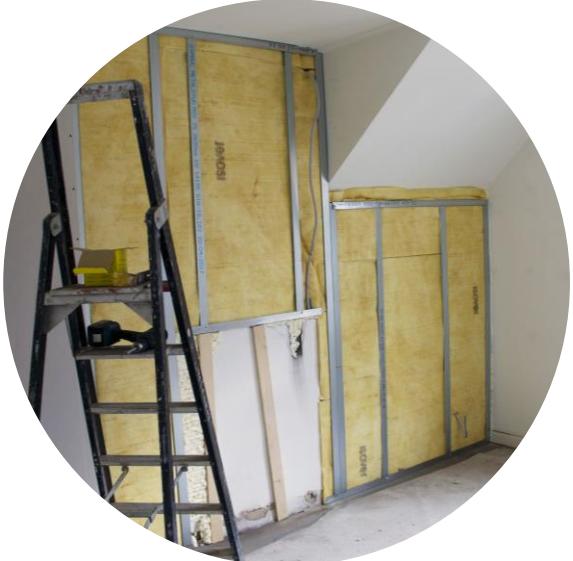

- **1. Woningmarkt: stijgende kosten**
- Stijgende prijzen bouwmaterialen sinds Q3 2020:
 - Covidcrisis
 - Oorlog in Oekraïne
 - Energiecrisis
 - Inflatie en stijgende loonkost
- Toch verwachten we slechts een beperkte stijging in de nominale prijzen van nieuwbouw en renovatie.
- We zitten nog niet echt in een recessie.
- Onderzoek iVox bij 2000 Belgen in opdracht Embuild:
8 op de 10 Belgen hebben eigenaarswens, huren is plan B

Woningmarkt: bouwen en renoveren blijven de moeite

- Onzekerheid (oorlog, energie,...), consumentenvertrouwen kreeg klap, maar niemand weet wat toekomst brengt...
 - Hypothecair krediet nog steeds laag
 - Energiewinsten via nieuwbouw en renovatie
 - Premies allerhande via gewesten
-
- -> Investeren in vastgoed blijft beste optie

- **Woningmarkt: hinderpalen woonplannen**
 - Grond-, bouw- en koopprijzen (73%)
 - Strenge energetische normen (61%)
 - Tekort gepast aanbod koopmarkt (51%)
 - Hypothecaire kredieten (44%)
- Bron: iVox-studie bij 2000 Belgen in opdracht van Embuild

Woningmarkt: een aantal succesformules

- Woningen voor kleine gezinnen en singles
- Post corona wonen (thuisbureau, tuin, ...)
- Woningen met laag energieverbruik

- **2. Moteurs pour la rénovation**
- Top 3 (étude iVox auprès de 2000 Belges commandée par Embuild)
 - Meilleur confort de vie (47 %)
 - Amélioration de la performance énergétique du logement (42 %)
 - Remplacement des éléments usés (40 %)

Moteurs pour la rénovation énergétique

- La raison la plus importante, de loin, est l'économie d'énergie (52 %)
- Réduction de l'impact environnemental (16 %)
- Réglementation obligatoire (16 %)

Type de rénovation énergétique

- Limitée à ce qui est strictement nécessaire (28 %)
- Limitée aux rénovations qui s'amortissent en 10 ans (27 %)
- Limitée aux rénovations qui s'amortissent en 5 ans (22 %)

- Financement de la rénovation énergétique
- Propres moyens (53 %)
- Prêt bancaire (29 %)
- Primes (11 %)

3. Ondersteunende maatregelen

- **Verlaagd btw-tarief van 6% op afbraak en heropbouw** verlengd tot eind 2023, met belofte minister om maatregel ook na eind 2023 te verlengen.
- **Btw-tarief van 6% op zonneboilers, zonnepanelen en warmtepompen**, al zeker tot eind 2023. Verlenging ook nodig.

• 4. Conclusions

- Le marché du logement face à des défis.
- Devenir propriétaire continue à être le rêve du Belge.
- La construction et la rénovation restent les meilleurs investissements : à court terme pour faire baisser la facture d'énergie, à long terme pour obtenir un meilleur rendement que votre compte-épargne.
- Epargner de l'énergie est la motivation principale d'une rénovation énergétique, qui est le plus souvent financée par ses propres moyens.
- Il faut des mesures fiscales pour encourager la rénovation énergétique.

Batibouw 2023

+37.000 euro!

A photograph of a woman's hands holding a glowing white crystal ball. The hands are positioned with fingers slightly spread, and the ball is centered between them. The woman has dark red nail polish on her fingernails. The background is a dark, textured surface, possibly a curtain or fabric, with dramatic lighting that highlights the glow of the crystal ball.
