

MOTORCYCLE PROTECTANT

Muc-Off is excited to update their range of premium motorcycle care products for 2015. The state of the art Motorcycle Protectant is an essential addition to any rider's workshop and adds a resilient protective layer.

Muc-Off Protectant is formulated to protect, preserve and freshen your motorcycle with an incredible water dispersing action. The high concentration of P.T.F.E helps prevent dirt adhesion between washes. It can be used all over the bike, and has an after wash corrosion inhibitor which drives out moisture and leaves a non-sticky protective layer smelling of vanilla. It's safe to use on motorcycle frames, chains, metal parts, plastics, rubber and paintwork.

- High performance formula leaves dry, non-sticky protective film
- For use after washing to drive out excess water
- High concentration of PTFE prevents dirt adhesion
- Makes an ideal winter protectant
- Quick and easy to use

RRP - £10
