

ThinPrint Brings Wi-Fi Printing to iPhones, iPads and Android Devices

With the ThinPrint Cloud Printer app, iOS and Android users can now additionally print via Wi-Fi without even needing a PC or Mac

(BERLIN/DENVER, May 21, 2015) [ThinPrint](#), manufacturer of the worldwide leading print management software, has released a new version of its [ThinPrint Cloud Printer](#). With the update iPhone, iPad and Android users print documents and photos to any printer in their current Wi-Fi network. A PC or Mac is not needed. ThinPrint Cloud Printer is free and without any in-app advertising.

If a user wants to print a document, photo or another file from his iPhone, iPad or Android device, the cloud-based app automatically shows which printers are available in the current Wi-Fi network. Once a printer is selected, the printout is sent through their smartphone or tablet to the printer. A PC or Mac isn't required. If a Wi-Fi printer isn't available, the user can still turn any printer into a cloud printer and print via a PC or Mac connected to the printer.

"With the latest version, we have made significant progress in our goal of providing users with a mobile printing solution that can be used easily and spontaneously in any situation," said Thi  n D. Nguyen, product manager ThinPrint Cloud Printer at ThinPrint. "By being fully manufacturer-independent, users with ThinPrint Cloud Printer need only one app to print with any printer. We solved the complex printer driver issue for customers by hosting over 7000 drivers in our cloud and letting everybody access them when needed. With this technology we enable users to print from their mobile devices to virtually any printer."

ThinPrint Cloud Printer is available free in Apple's App Store and the Google Play Store. The app is completely free of any in-app advertising.

Installation and setup information can be found at: <http://cloudprinter.thinprint.com/wifi>

ThinPrint GmbH

ThinPrint, with 15 years of continuous development and internationally-patented ThinPrint technology, is the leading provider of print management software and services for businesses.
