

**Signal LT Pant**  
**Breathable, Durable, Water resistant: Pick all 3.**

San Francisco, Ca., August 22, 2022 - Mission Workshop has unveiled a limited edition release of their classic Signal pants using the tried and tested Tweave 518C fabric found on their MTB Shorts. Borrowing the material from the MTB shorts results in a beautifully lightweight, breathable, and durable all-season garment for anyone who likes to keep going even when the conditions suggest otherwise.

The highlight of the Signal LT is the introduction of the Tweave 518C - as the star of the MTB Shorts, Tweave 518C is considerably lighter (35%, if we're talking numbers) than the 520E material used on the standard Signal. Not only are the Signal LT pants lighter, they don't compromise on durability and performance that the standard Signal pants are praised for. Breathable, durable, wicking and quick drying pants that use a standard jean front and back template with added knife and an extra seam zip on the side to accommodate the most complete EDC kits, these pants are designed to become your favorite pair.

**Features:**

- 4-Way stretch
- YKK zippers
- 6 Pockets total including side zip seam pocket
- Wicking and quick drying
- All sizes feature 34" inseam
- Made in New York
- Tweave 518C military-spec textile
- 84% Nylon, 16% Spandex (fully nylon encapsulated)
- MSRP \$235 | [Landing page](#) | [Image assets](#)
