Sennheiser concludes anniversary promotions with top-of-the-range e 965

The switchable-pattern vocal mic is ideal for the stage and the studio

***Wedemark, 1 December 2020* – A truly exceptional offer for a truly exceptional microphone concludes Sennheiser’s anniversary promotions in December: The evolution e 965 is a large-diaphragm, true condenser handheld microphone that brings studio sound to the stage, and can be switched between a cardioid pick-up pattern and the tighter super-cardioid pattern. In December, the e 965 is available at the anniversary price of just EUR 299/USD 299.95 (MSRP/MAP) instead of EUR 499/USD 499.95 (MSRP/MAP) while stocks last. Please visit www.sennheiser.com/special-deals for a list of dealers offering this special promotion.**

The e 965 leaves nothing to be desired in terms of sound, ruggedness and handling. The flagship model of the evolution series combines the advantages of a high-end studio microphone and those of a rugged stage mic: It offers a detailed, high-resolution sound while ensuring high feedback rejection and offering the rugged design needed for the tough demands of stage work.

The sophisticated sound of the e 965 true condenser microphone succeeds in being both balanced and powerful at the same time. The microphone gives vocals a silky sparkle in the treble and reproduces the lower mids in a warm yet well-defined manner. The microphone

features fast transient response and captures even the finest nuances with rich detail. Its shock-mounted capsule excellently rejects handling noise.

Available as a special offer while stocks last: the e 965 is Sennheiser's anniversary deal for the month of December

Depending on the stage situation, the pick-up pattern of the evolution e 965 can be switched between (gentler) cardioid and (more direct) super-cardioid. Switchable low-cut and pre-attenuation (-10dB pad), and pop and wind protection round off a truly exceptional microphone.

Thanks to a dual diaphragm, the e 965 can be switched between cardioid and super-cardioid patterns
