

Brussels, 1st February 2023

A Circular Future with Plastics 2023: Open Tickets, TotalEnergies sponsors and Valobat is joining.

Press Release

EuPC with the French Association [Polyvia](#) and [Plastics Europe](#) are delighted to announce you that the tickets to participate to the long-awaited two-day annual Conference *A Circular Future with Plastics* are finally open to sale.

We also have the honour to count TotalEnergies among the main sponsors of the 2023 edition.

The two-day event will take place on **23rd & 24th May 2023** in **Lyon, France**. All the conferences, meetings and debates of the Annual Event will take place at the convention space L'Espace Tête d'Or, while the gala dinner will be organised in the prestigious Palais de la Bourse.

During the first day, three Market Sessions on Packaging, Automotive and Building & Construction will take place in parallel. Experts from the three sectors will present and discuss the most important recent developments.

Mr. Claude Clément, President & CEO Europe at Plastic Omnium, CITEO, but also Corplex, Valobat, Kaléi and others have already confirmed their presence.

In the evening, in addition to the cocktail and the gala dinner, the awards ceremony of the **Best Polymer Producers Awards** is finally held again after a year of absence. Initiated by [Polymers for Europe Alliance](#), its members will vote and award the best suppliers in different polymer type categories.

During the second day, on the 24th of May, there will be the main conference with the panel debate. Moderated by the journalist Mrs. Melinda Crane, the main conference will host representatives of national and European institutions, CEOs of the plastics manufacturing and converting world, as well as other industry leaders who will share their knowledge and experience about the trends of the sector.

In the light of the most recent developments on the European level, and based on the ever-growing importance of themes like climate change, circularity and sustainability, re-use, recycling & waste prevention, the recurring title for the event and debates "**A Circular Future with Plastics**" could not have been better chosen.

More announcements to come...
