ReachYourPeak – Madeleine Cope

What fascinates you about climbing?

That it never gets boring! It is a passion for life! There is so much to explore in climbing; so many movements and combinations of movements, and so many different environments. It is fascinating how climbing brings together environment, movement, and the mind.

What's driving you?

I am driven by new experiences. This is both to climb in new places, but also to push myself in new ways.

What is your biggest dream?

My biggest dream in climbing is to put up a big wall first ascent! I love the feeling of being a small speck on a big rock face. I enjoyed the unknown elements of first ascents, so it is my dream to bring these together.
